## :- Introduction

The RES-1242P is an unmanaged Ethernet switch with twenty-four 10/100Base-T(X) LAN ports and two 100Base-FX SFP ports. The SFP ports can meet demand tor long-distance data transmission. With a wide operating temperature range from $-40^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$, the device can work reliably in harsh environments.

## : Package Contents

The device is shipped with the following items. If any of these items is missing or damaged, please contact your customer service representative

| Contents | Pictures | Number |
| :---: | :---: | :---: |
| RES-1242P | $\square$ | x 1 |
| QIG | $\square$ | x 1 |
| Screw (M3 $\times 4$ ) | $\otimes$ | x 8 |
| $\underbrace{\text { Rack-mounted }}$ kit $L$ RR) | 明 | x 1 |
| Power cord |  | x 1 |

## : Preparation

Before you begin installing the switch, make sure you have all of the package
contents available.
avab
Safety \& Warnings
Elevated Operating Ambient: If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximu ified by the manufacture
$\triangle$ Reduced Air Flow: Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment
not compromised.

$\triangle$ Mechanical Loading: Mounting of the equipment in the rack should be
such that a such that a hazardous condition is not achieved due to uneven mechanical Circuit Overloading: Consideration should be given to the connection of the
\. $\begin{aligned} & \text { Circuit Overloading: Consideration should be given to the connection of the } \\ & \text { equipment to the supply circuit and the effect that onerloading of the circuits }\end{aligned}$ might have on overcurrent protection and supply wiring. Appropriate
consideration of equipment nameplate ratings should be used when consideration of equipment nameplate ratings should be used when addressing his concern..

## -Installation

- Rack-mounting

Step 1: Attach the wall-mounting kits to the left and right sides of the device on the front.
Step 2: With front brackets orientated in front of the rack, fasten the brackets to the rack using two more

4

- Network Connection

The device has standard Ethernet ports. According to the link type, the switch uses CAT 3, 4 5,5e UTP cables to connect to any other network devices (PCs, servers, switches, routers, of hubs). Please refer to the following table for cable specification
Cable Types and Specifications:

| Cable | Type | Max. Length | Connector |
| :--- | :--- | :---: | :---: |
| 108ASE-T | Cat. $3,4,5100$-ohm | UTP $100 \mathrm{~m}(328$ ft $)$ | RJ.45 |
| 1008 SSE-TX | Cat. 5100 -ohm UTP | UTP $100 \mathrm{~m}(328$ ft $)$ | RJ.45 |

For pin assignments for different types of cables, please refer to the following
tables.

| 10/100 Base-T(X) RJ-45 |  | 10/100Base-T(X) MDIMDI-X Pin Assignments: |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Pin Number | Assignment | Pin Number | MDI port | MDI-X port |
| 1 | TD+ | 1 | TD+(transmit) | RD+(receive) |
| 2 | TD- | 2 | TD-(transmit) | RD-(reeive) |
| 3 | RD+ | 3 | RD+(receive) | TD+(transmit) |
| 4 | Not used | 4 | Not used | Not used |
| 5 | Not used | 5 | Not used | Not used |
| 6 | RD- | 6 | RD-(reecive) | TD-(transmit) |
| 7 | Not used | 7 | Not used | Not used |
| 8 | Not used | 8 | Not used | Not used |

Note: "+" and "-" signs represent the polarity of the wires that make up each wire pair.

## SFP Connection

The device supports fiber connection via SFP transceivers which are hot-swappable and can be plugged into the SFP ports to connect the switch with the fiber-optic network. Please
Switch B.

- Wiring

AC Power Connection
The device is powered by AC electricity. Simply insert the AC power cable to the power connector at the back of the switch and turn on the power switch. The input voltage is AC $100 \mathrm{~V} \sim 240 \mathrm{~V}$ /
$50 \sim 60 \mathrm{~Hz}$.

Grounding
Grounding and wire routing help limit the effects of noise due to electromagnetic interference (EMI). Run the ground connection from the ground screws to the grounding surface prior to

## :Configurations

After installing the switch and connecting cables, the green power LED should turn on After installing the switch and connecting cables, the
Please refer to the following table for LED definition.

- LED indication table

| LED | Color | Staus | Descripion |
| :---: | :---: | :---: | :---: |
| PWR | Green | On | System power on |
| 10/100Base-T(X) RJ45 port |  |  |  |
| Link/Act | Green | On | Port is comnected |
| Speed | Green | On | Portis sunning at 100 Mbps |
|  |  | Off | Port is sunning is 10 Mbps |
| 100Base-FX SFP port |  |  |  |
| Link/Act | Green | On | Port connected |
|  |  | Blinking | Transmiting data |
