## 1. Product Overview

### 1.1 Introduction

Cervoz Industrial mSATA Embedded Module R335 family is a Solid State Disk product that is in compliance with the mSATA form factor and SATA III standards. mSATA R335 family fits in any mSATA sockets in a PC or motherboard; it can be used for both booting and storage purposes.

R335 family uses preselected multi-level cell (MLC) NAND flash memory from the industry leading manufacturer Micron and utilizes our “Reliability Optimized-MLC (RO-MLC) Technology”. We adopt specialized firmware to control MLC NAND flash which only uses the strong pages of MLC NAND as storage; the technology is manipulated at the block level, and with each block's capacity halved by treating it as SLC. This product includes various capacities to choose from.

R335 family offers high performance with reliability and endurance, as well as a remarkable price-performance ratio, ideal for applications in harsh environments. Industrial PC/Embedded PC, Factory Automation, Transportation, Information & Entertainment and Server & Cloud Computing all benefit from this superior reliability and cost-effectiveness.
