

Model	DCDC-USB
Beschreibung/Description	Power Adapter DC-DC/5-24VDC/6A/4P
Artikelnummer/Part N°	145134

- High power buck-boost microcontroller DC-DC converter
- DC Input from 6 to 30 VDC
- Regulated output set by jumper
 - 5V, 6V, 9V, 12V, 13,5V 18V or 24V
 - Fine settings via USB in 0,25 VDC steps from 5V to 24V
- 4 operation modes
 - Regular buck-boost with wide input and fixed output
 - Automotive mode with ignition aware to turn on/off the motherboard by pulse
 - UPS mode with shut-down function based on battery voltage
 - Programming mode following scripts to wake up or sleep
- Below 1mA power consumption
- Remote on/off switching up to 6A (8A peak)
- Motherboard control pins
- Fused input, TVS protected
- USB mini Type B
- Solid CAPs from Sanyo
