1.0 General Description

ADATA IMSS316 3D TLC industrial-grade mSATA solid-state drives (SSD) are equipped with 3D NAND TLC Flash for superb read/write speeds of up to 560/480MB per second, and come in capacities ranging from 128GB to 2TB. They are compliant with JEDEC MO-300A and are ideal for desktop PCs, thin clients, industrial computing, and embedded applications, and take full advantage of ADATA's proprietary A+ Testing Methodology, which encompass Functionality Testing and Reliability Validation. This guarantees the drives meet the exacting requirements of industrial and enterprise applications. What's more, with support for LDPC (Low-Density Parity-Check) error correcting code technology, IMSS316 SSDs can detect and fix errors to ensure data integrity and thus enjoy an extended lifespan.
