## 2.1 Anti-static Precautions

**WARNING:**

Failure to take ESD precautions during installation may result in permanent damage to the TANK-760 and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the TANK-760. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the TANK-760 or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- ***Self-grounding:*** Touch any grounded conducting material before handling the board. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring the TANK-760, place it on an anti-static pad. This reduces the possibility of ESD damaging the TANK-760.

## 2.2 Unpacking Precautions

When the TANK-760 is unpacked, please do the following:

- Follow the anti-static precautions outlined in **Section 2.1**.
- Make sure the packing box is facing upwards so the TANK-760 does not fall out of the box.
- Make sure all the components shown in **Section 2.3** are present.

## 2.3 Unpacking Checklist

### 3.1 Installation Precautions

During installation, be aware of the precautions below:

- **Read the user manual:** The user manual provides a complete description of the TANK-760, installation instructions and configuration options.
- **DANGER! Disconnect Power:** Power to the TANK-760 must be disconnected during the installation process, or before any attempt is made to access the rear panel. Electric shock and personal injury might occur if the rear panel of the TANK-760 is opened while the power cord is still connected to an electrical outlet.
- **Qualified Personnel:** The TANK-760 must be installed and operated only by trained and qualified personnel. Maintenance, upgrades, or repairs may only be carried out by qualified personnel who are familiar with the associated dangers.
- **Air Circulation:** Make sure there is sufficient air circulation when installing the TANK-760. The TANK-760's cooling vents must not be obstructed by any objects. Blocking the vents can cause overheating of the TANK-760. Leave at least 5 cm of clearance around the TANK-760 to prevent overheating.
- **Grounding:** The TANK-760 should be properly grounded. The voltage feeds must not be overloaded. Adjust the cabling and provide external overcharge protection per the electrical values indicated on the label attached to the back of the TANK-760.

### 3.2 Hard Disk Drive (HDD) Installation

To install the hard drive, please follow the steps below:

- Step 1:** Remove the bottom panel by removing the five retention screws from the bottom panel.

**Figure 3-1: Bottom Panel Retention Screws**

**Step 2:** Remove the four HDD bracket retention screws and unplug the SATA signal and power cables connected to the TANK-760. And then lift the HDD bracket out of the TANK-760 and put it on a flat surface.

**Figure 3-2: HDD Bracket Retention Screws**

## TANK-760 Embedded System

**Step 3:** Attach each HDD to the HDD bracket, and then slide each HDD to connect the SATA connectors.

**Figure 3-3: HDD Installation**

**Step 4:** Secure each HDD with the HDD bracket by four retention screws (eight in all).

**Figure 3-4: HDD Retention Screws**

**Step 5:** Secure the HDD bracket with TANK-760 by the four retention screws that were previously removed.

**Step 6:** Reconnect the SATA signal and power cables to the TANK-760.

**Step 7:** Reinstall the bottom panel to the TANK-760.

### 3.3 SO-DIMM Installation

**WARNING:**

Using incorrectly specified SO-DIMM may cause permanently damage the TANK-760. Please make sure the purchased SO-DIMM complies with the memory specifications of the TANK-760.

To install a SO-DIMM into a SO-DIMM socket, please follow the steps below.

- Step 1:** Remove the bottom panel by removing the five retention screws from the bottom panel (**Figure 3-1**).
- Step 2:** Unplug the SATA signal and power cables connected to the TANK-760, and then place the bottom panel on a flat surface.
- Step 3:** Locate the SO-DIMM socket on the motherboard (**Figure 3-5**).

**Figure 3-5: SO-DIMM Socket**

## TANK-760 Embedded System

**Step 4:** Align the SO-DIMM with the socket. The SO-DIMM must be oriented in such a way that the notch in the middle of the SO-DIMM must be aligned with the plastic bridge in the socket (**Figure 3-6**).

**Step 5:** Push the SO-DIMM into the socket at an angle (**Figure 3-6**).

**Figure 3-6: SO-DIMM Installation**

**Step 6:** Gently pull the arms of the SO-DIMM socket out and push the rear of the SO-DIMM down (**Figure 3-6**).

**Step 7:** Release the arms on the SO-DIMM socket. They clip into place and secure the SO-DIMM in the socket.

**Step 8:** Install the bracket that was previously removed in the same position it was before.

**Step 9:** Reinstall the bottom panel to the TANK-760.

# Safety Precautions

---

## A.1 Safety Precautions

---

### WARNING:

The precautions outlined in this appendix should be strictly followed. Failure to follow these precautions may result in permanent damage to the TANK-760.

---

Please follow the safety precautions outlined in the sections that follow:

### A.1.1 General Safety Precautions

Please ensure the following safety precautions are adhered to at all times.

- ***Make sure the power is turned off and the power cord is disconnected*** when moving, installing or modifying the system.
- ***Do not apply voltage levels that exceed the specified voltage range.*** Doing so may cause fire and/or an electrical shock.
- ***Electric shocks can occur*** if opened while still powered on.
- ***Do not drop or insert any objects*** into the ventilation openings.
- ***If considerable amounts of dust, water, or fluids enter the system***, turn off the power supply immediately, unplug the power cord, and contact the system vendor.
- **DO NOT:**
  - Drop the system against a hard surface.
  - In a site where the ambient temperature exceeds the rated temperature

### A.1.2 Anti-static Precautions

---

### WARNING:

Failure to take ESD precautions during the installation of the TANK-760 may result in permanent damage to the TANK-760 and severe injury to the user.

---

## TANK-760 Embedded System

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the TANK-760. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the TANK-760 is opened and any of the electrical components are handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging any electrical component.
- ***Self-grounding:*** Before handling any electrical component, touch any grounded conducting material. During the time the electrical component is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring or working with an electrical component, place it on an anti-static pad. This reduces the possibility of ESD damage.
- ***Only handle the edges of the electrical component:*** When handling the electrical component, hold the electrical component by its edges.

### A.1.3 Product Disposal

#### CAUTION:

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union - If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union:

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes

monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your display products, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

## A.2 Maintenance and Cleaning Precautions

When maintaining or cleaning the TANK-760, please follow the guidelines below.

### A.2.1 Maintenance and Cleaning

Prior to cleaning any part or component of the TANK-760, please read the details below.

- The interior of the TANK-760 does not require cleaning. Keep fluids away from the TANK-760 interior.
- Be cautious of all small removable components when vacuuming the TANK-760.
- Turn the TANK-760 off before cleaning the TANK-760.
- Never drop any objects or liquids through the openings of the TANK-760.
- Be cautious of any possible allergic reactions to solvents or chemicals used when cleaning the TANK-760.
- Avoid eating, drinking and smoking within vicinity of the TANK-760.

### A.2.2 Cleaning Tools

Some components in the TANK-760 may only be cleaned using a product specifically designed for the purpose. In such case, the product will be explicitly mentioned in the cleaning tips. Below is a list of items to use when cleaning the TANK-760.

- **Cloth** – Although paper towels or tissues can be used, a soft, clean piece of cloth is recommended when cleaning the TANK-760.
- **Water or rubbing alcohol** – A cloth moistened with water or rubbing alcohol can be used to clean the TANK-760.
- **Using solvents** – The use of solvents is not recommended when cleaning the TANK-760 as they may damage the plastic parts.

## TANK-760 Embedded System

- ***Vacuum cleaner*** – Using a vacuum specifically designed for computers is one of the best methods of cleaning the TANK-760. Dust and dirt can restrict the airflow in the TANK-760 and cause its circuitry to corrode.
- ***Cotton swabs*** - Cotton swaps moistened with rubbing alcohol or water are excellent tools for wiping hard to reach areas.
- ***Foam swabs*** - Whenever possible, it is best to use lint free swabs such as foam swabs for cleaning.

# Hazardous Materials Disclosure

---

## B.1 Hazardous Materials Disclosure Table for IPB Products Certified as RoHS Compliant Under 2002/95/EC Without Mercury

The details provided in this appendix are to ensure that the product is compliant with the Peoples Republic of China (China) RoHS standards. The table below acknowledges the presences of small quantities of certain materials in the product, and is applicable to China RoHS only.

A label will be placed on each product to indicate the estimated “Environmentally Friendly Use Period” (EFUP). This is an estimate of the number of years that these substances would “not leak out or undergo abrupt change.” This product may contain replaceable sub-assemblies/components which have a shorter EFUP such as batteries and lamps. These components will be separately marked.

Please refer to the table on the next page.
