

Conformal Coating

Conformal Coating

Industrial DRAM & Flash Module

Available On Cervoz

Industrial DRAM & Flash Module

Cervoz offers a value-added service "Conformal Coating" to enhance the robustness of our DRAM and Flash modules.

Conformal Coating utilizes acrylic resin material, which can protect against moisture, dust, chemicals, thermal shocks, sunlight and sustain extended temperature, it demonstrates excellent flexibility and electrical properties; it also fluoresces under UV light, which is easy to inspect and repair.

By applying this REACH/RoHS certified coating onto Cervoz industrial DRAM & Flash modules would make them excellent computing storage solutions for factory automation, marine, military, outdoor and industrial critical environment applications.
