All registered trademarks and product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

# Manual Conventions

---

**WARNING**

Warnings appear where overlooked details may cause damage to the equipment or result in personal injury. Warnings should be taken seriously.

**CAUTION**

Cautionary messages should be heeded to help reduce the chance of losing data or damaging the product.

**NOTE**

These messages inform the reader of essential but non-critical information. These messages should be read carefully as any directions or instructions contained therein can help avoid making mistakes.

**HOT SURFACE**

This symbol indicates a hot surface that should not be touched without taking care.

# Introduction

---

1.1 Overview

Figure 1-1: TANK-870-Q170 Series

The TANK-870-Q170 Series is an embedded system for wide range temperature environments. It is powered by the 6th/7th generation Intel® Core™ processor, uses the Intel® Q170 chipset and supports two 260-pin DDR4 SDRAM SO-DIMM modules up to 64 GB (4 GB memory preinstalled). The TANK-870-Q170 Series includes one VGA port, one HDMI+DP port, one iDP port (optional) , two GbE LAN ports, four USB 3.0 (5Gb/s) ports, four USB 2.0 ports, four RS-232 connectors and two RS-232/422/485 connectors.

## TANK-870-Q170 Embedded System

### 1.2 Model Variations

The model variations of the TANK-870-Q170 Series are listed below.

Model No.	CPU	Expansion Slots
TANK-870-Q170i-i5/4G/2A-R10	Intel® Core™ i5-6500TE 2.3GHz (up to 3.3 GHz, Quad Core, TDP 35W)	2 x PCIe by 8 expansion,
TANK-870-Q170i-i5/4G/2B-R10		1 x PCIe by 16 & 1 x PCI expansion
TANK-870-Q170i-i5/4G/4A-R10		2 x PCIe by 8 & 2 x PCI expansion
TANK-870-Q170i-i5/4G/4B-R10		1 x PCIe by 16 & 3 x PCI expansion
TANK-870-Q170i-i7/4G/2A-R10	Intel® Core™ i7-6700TE 2.4GHz (up to 3.4 GHz, Quad Core, TDP 35W)	2 x PCIe by 8 expansion
TANK-870-Q170i-i7/4G/2B-R10		1 x PCIe by 16 & 1 x PCI expansion
TANK-870-Q170i-i7/4G/4A-R10		2 x PCIe by 8 & 2 x PCI expansion
TANK-870-Q170i-i7/4G/4B-R10		1 x PCIe by 16 & 3 x PCI expansion

**Table 1-1: TANK-870-Q170 Series Model Variations**

### 1.3 Features

The TANK-870-Q170 Series features are listed below:

- 6th/7th Gen. Intel® Core™ processor platform with Intel® Q170 chipset and DDR4 memory
- Triple independent display with high resolution support
- Rich high-speed I/O interfaces on one side for easy installation
- On-board internal power connector for providing power to add-on cards
- Great flexibility for hardware expansion

## 1.4 Technical Specifications

The TANK-870-Q170 Series technical specifications are listed in **Table 1-2**.

Specifications	
Chassis	
Color	Black C + Silver
Dimensions (WxHxD) (mm)	2-slot: 121.5 x 255.2 x 205 4-slot: 154.8 x 255.2 x 205
System Fan	Fanless
Chassis Construction	Extruded aluminum alloy
Motherboard	
CPU	Intel 7th Gen Core CPU & Intel® Core™ i7-6700TE (2.4 GHz, quad-core, TDP=35W) Intel® Core™ i5-6500TE (2.3 GHz, quad-core, TDP=35W)
Chipset	Intel® Q170
System Memory	2 x 260 pin DDR4 SO-DIMM, one 4 GB pre-installed (system max: 64GB)
IPMI	
iRIS Solution	1 x iRIS-2400 (optional)
Storage	
Hard Drive	2 x 2.5" SATA 6Gb/s HDD/SSD bay (RAID 0/1 support)
I/O Interfaces	
USB 3.0 (5Gb/s)	4
USB 2.0	4
Ethernet	2 x RJ45 LAN1: Intel® I219LM PCIe controller LAN2 (iRIS): Intel® I210 PCIe controller

## TANK-870-Q170 Embedded System

Specifications	
<b>COM Port</b>	4 x RS-232 (2 x RJ-45, 2 x DB-9 w/ isolation) 2 x RS-232/422/485 (DB-9)
<b>Digital I/O</b>	8-bit digital I/O, 4-bit input/4-bit output
<b>Display</b>	1 x VGA 1 x HDMI+DP 1 x iDP (optional)
<b>Resolution</b>	VGA: Up to 1920 x 1200@60Hz HDMI/DP: Up to 4096x2304@60Hz
<b>Audio</b>	1 x Line-out, 1 x Mic-in
<b>Wireless</b>	1 x 802.11 a/b/g/n/ac (optional)
Expansions	
<b>PCI/PCIe</b>	2 slot model: 1 x PCIe x 16 , 1 x PCI 2 slot model: 2 x PCIe x 8 4 slot model: 2 x PCIe x 8 , 2 x PCI, 1 x Full Size Mini PCIe 4 slot model: 1 x PCIe x 16 , 3 x PCI, 1 x Full Size Mini PCIe
<b>PCIe Mini</b>	1 x Half size PCIe mini Card 1 x Full size PCIe mini Card (supports mSATA, colay with SATA)
Power	
<b>Power Input</b>	DC Jack: 9 V~36 V DC Terminal Block: 9 V~36 V DC
<b>Power Consumption</b>	19 V@3.68 A (Intel® Core™ i7-6700TE with 8 GB memory)
<b>Internal Power Connector</b>	5V@3A or 12V@3A
Reliability	
<b>Mounting</b>	Wall mount

**TANK-870-Q170 Embedded System**

Specifications	
Operating Temperature	i7-6700TE -20°C ~ 45°C with air flow (SSD), 10% ~ 95%, non-condensing i5-6500TE -20°C ~ 60°C with air flow (SSD), 10% ~ 95%, non-condensing
Storage Temperature	-40°C ~ 85°C with air flow (SSD), 10% ~ 90%, non-condensing
Operating Shock	Half-sine wave shock 5G; 11ms; 100 shocks per axis
Operating Vibration	MIL-STD-810G 514.6 C-1 (with SSD)
Weight (Net/Gross)	2-slot: 4.2 kg/6.3 kg 4-slot: 4.5 kg/6.5 kg
Safety/EMC	CE/FCC
OS	
Supported OS	Microsoft® Windows® 8 Embedded, Microsoft® Windows® Embedded Standard 7 E Microsoft® Windows® 10 IoT Enterprise

**Table 1-2: Technical Specifications**

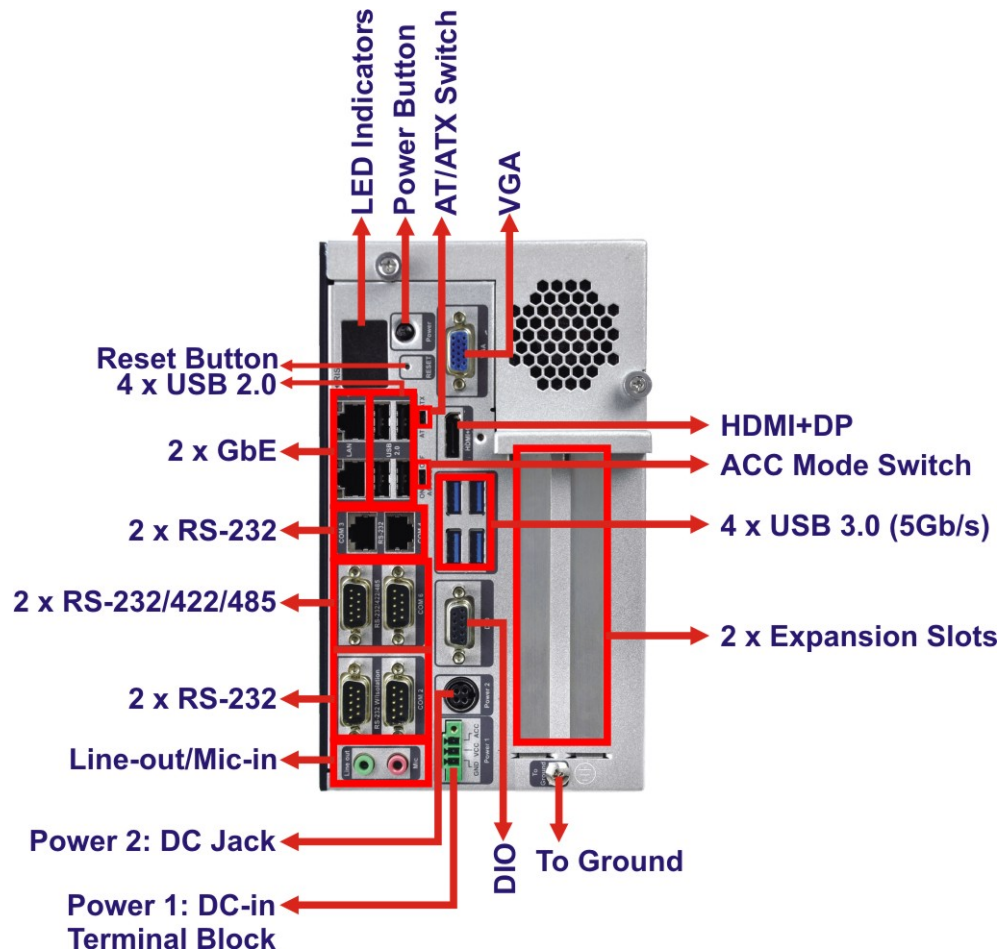

## TANK-870-Q170 Embedded System

### 1.5 Front Panel

#### 1.5.1 TANK-870-Q170-2 slot Front Panel

The front panel of the TANK-870-Q170 Series has the following features (**Figure 1-2**):

**Figure 1-2: TANK-870-Q170 Series Front Panel**

Connectors and buttons on the front panel include the following:

- 1 x 4-pin power DC jack for 9 V ~ 36 V power input
- 1 x Power terminal block for 9 V ~ 36 V power input
- 1 x Mic-in port (pink)
- 1 x Line-out port (green)
- 2 x RS-232 serial ports (DB-9)
- 2 x RS-232 serial ports (RJ-45)

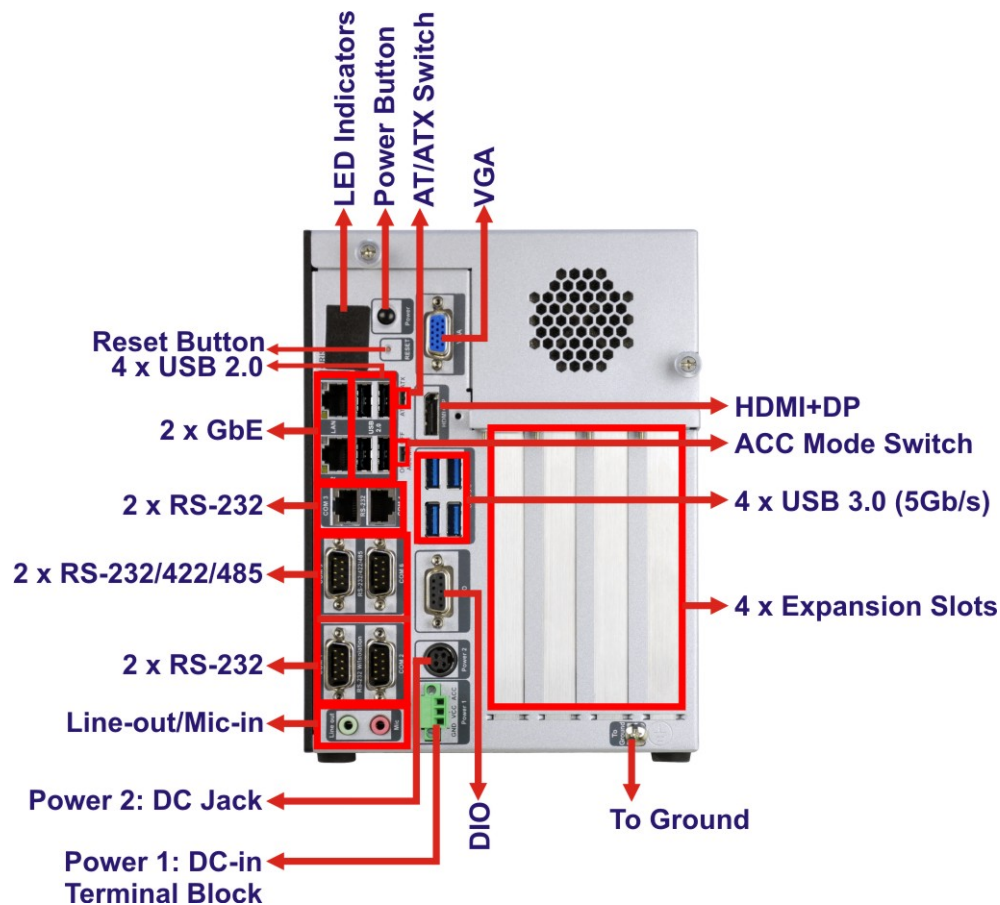

- 2 x RS-232/422/485 serial ports (DB-9)
- 2 x Gigabit Ethernet ports (RJ-45)
- 4 x USB 3.0 (5Gb/s) ports
- 4 x USB 2.0 ports
- 1 x Reset button
- 6 x LED indicators (**Section 1.7**)
- 1 x Power button
- 1 x VGA port
- 1 x HDMI+DP port
- 1 X DIO port
- 1 x To Ground
- 2 x Expansion slots
- 1 x ACC mode switch
- 1 x AT/ATX mode switch

## TANK-870-Q170 Embedded System

### 1.5.2 TANK-870-Q170-4 slot Front Panel

The front panel of the TANK-870-Q170 Series has the following features (**Figure 1-3**):

**Figure 1-3: TANK-870-Q170 Series Front Panel**

Connectors and buttons on the front panel include the following:

- 1 x 4-pin power DC jack for 9 V ~ 36 V power input
- 1 x Power terminal block for 9 V ~ 36 V power input
- 1 x Mic-in port (pink)
- 1 x Line-out port (green)
- 2 x RS-232 serial ports (DB-9)
- 2 x RS-232 serial ports (RJ-45)
- 2 x RS-232/422/485 serial ports (DB-9)
- 2 x Gigabit Ethernet ports (RJ-45)
- 4 x USB 3.0 (5Gb/s) ports

- 4 x USB 2.0 ports
- 1 x Reset button
- 6 x LED indicators (**Section 1.7**)
- 1 x Power button
- 1 x VGA port
- 1 x HDMI+DP port
- 1 X DIO port
- 1 x To Ground
- 4 x Expansion slots
- 1 x ACC mode switch
- 1 x AT/ATX mode switch

## 1.6 Rear Panel

The rear panel of the TANK-870-Q170 Series has the following features (**Figure 1-4**):

**Figure 1-4: TANK-870-Q170 Series Rear Panel**

## TANK-870-Q170 Embedded System

### 1.7 LED Indicators

There are several indicators on the rear panel of the TANK-870-Q170 Series as shown in Figure 1-5.

Figure 1-5: TANK-870-Q170 Series LED Indicators

The descriptions of each LED indicator are listed below.

LED Indicator	Description
AT Power Mode	The current power mode status is AT mode. Controlled by the AT/ATX power mode switch.
i	Shows IPMI status.
Power LED1	<b>Breathing Orange:</b> Standby mode.
Power LED2	<b>Solid blue:</b> Power-on mode.
HDD	Shows HDD status.
CPU Temperature Alert	<b>Red:</b> CPU temperature is too high.

Table 1-3: LED Indicators Description

#### WARNING:

The CPU Temperature Alert LED turns red when the CPU temperature is too high. If this situation occurs, lower the environment temperature or close some running applications to cool down the CPU.

1.8 Backplane Options

The backplane options of the TANK-870-Q170 Series are shown below.

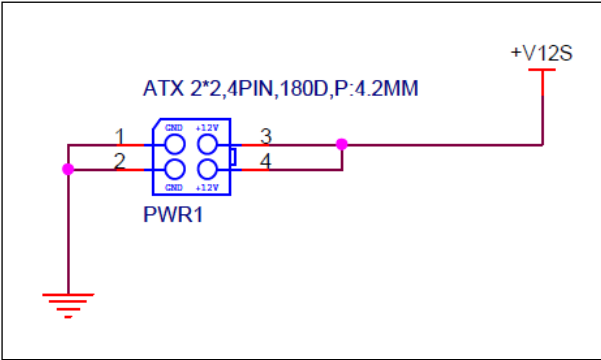

Figure 1-6: HPE-2S86 (for 2A model)

PWR1:

Pin	Description
1	GND
2	GND
3	+12 V
4	+12 V

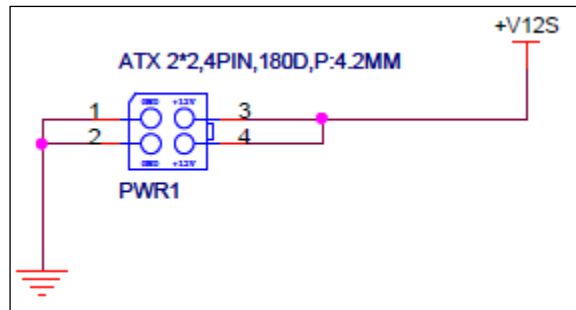

Figure 1-7: HPE-4AS87 (for 4A model)

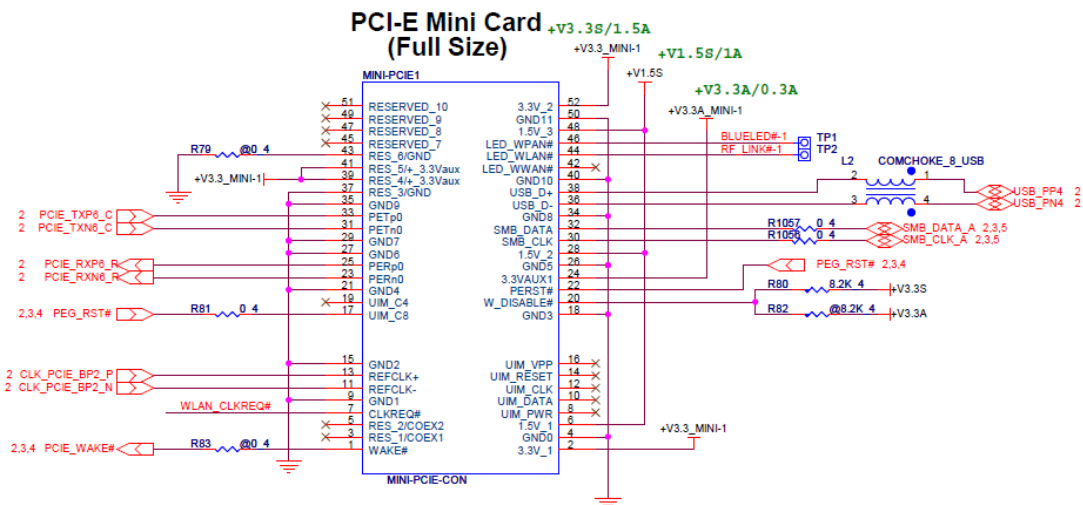

# TANK-870-Q170 Embedded System

## PWR1:

Pin	Description
1	GND
2	GND
3	+ 12 V
4	+ 12 V

## MINI-PCIE1:

	PCI	PCI
<b>HPE-2S87</b> <b>(for 2B model)</b>	PCle x16	PCle x16
	PCI	PCI
<b>HPE-4S87</b> <b>(for 4B model)</b>	PCle x16	PCle x16
	PCI	PCI
	PCI	PCI
	PCI	PCI

**Table 1-4: Supported Signals**

The rated voltage and current of the backplanes are listed below.

Rated Voltage	Rated Current
+5 V	4.0 A
+12 V	2.5 A
-12 V	0.1 A
+3.3 V	5.0 A

**Table 1-5: Rated Voltage and Current**

**WARNING:**

The system default power is 120 W. The maximum total power of the backplane to support expansion cards is 45 W. The power of the selected expansion cards can not exceed the max. power (45 W), otherwise, the system may be unstable.

**NOTE:**

When using an expansion card with high power consumption, it is recommended to install an external power supply to the power input connector on the backplane.

The four types of backplane support standard PCI/PCIe cards with maximum dimensions (WxL): 110 x 230 mm.

---

The TANK-870-Q170 provides the most convenient 4-pin internal power connector for add-on card usage, adding more flexibility to the embedded system in industrial environment. The internal power connector supports 5V@3A or 12V@3A power supply.

## TANK-870-Q170 Embedded System

### 1.9 Physical Dimensions

The following sections describe the physical dimensions for each model of the TANK-870-Q170 Series.

#### 1.9.1 TANK-870-Q170-2 slot Physical Dimensions

The physical dimensions of the TANK-870-Q170-2 slot are shown in **Figure 1-10**.

Figure 1-10: TANK-870-Q170-2 slot Physical Dimensions (millimeters)

1.9.2 TANK-870-Q170-4 slot Physical Dimensions

The physical dimensions of the TANK-870-Q170-4 slot are shown in **Figure 1-11**.

Figure 1-11: TANK-870-Q170-4 slot Physical Dimensions (millimeters)

# Unpacking

---

## 2.1 Anti-static Precautions

### WARNING:

Failure to take ESD precautions during installation may result in permanent damage to the TANK-870-Q170 Series and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the TANK-870-Q170 Series. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the TANK-870-Q170 Series or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- ***Self-grounding:*** Before handling the board touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring the TANK-870-Q170 Series, place it on an anti-static pad. This reduces the possibility of ESD damaging the TANK-870-Q170 Series.

## 2.2 Unpacking Precautions

When the TANK-870-Q170 Series is unpacked, please do the following:

- Follow the anti-static precautions outlined in **Section 2.1**.
- Make sure the packing box is facing upwards so the TANK-870-Q170 Series does not fall out of the box.
- Make sure all the components shown in **Section 2.3** are present.

## TANK-870-Q170 Embedded System

### 2.3 Unpacking Checklist

**NOTE:**

If some of the components listed in the checklist below are missing, please do not proceed with the installation. Contact the IEI reseller or vendor you purchased the TANK-870-Q170 Series from or contact an IEI sales representative directly. To contact an IEI sales representative, please send an email to [sales@ieiworld.com](mailto:sales@ieiworld.com).

The TANK-870-Q170 Series is shipped with the following components:

Quantity	Item and Part Number	Image
<b>Standard</b>		
1	TANK-870-Q170 Series	
2	Mounting Brackets	
1	Chassis Screw	

Quantity	Item and Part Number	Image
Standard		
1	HDMI Security Holder	
2	RJ-45 to D-sub 9-pin connector	

The following table lists the optional items that can be purchased separately.

Optional	
European power cord <b>(P/N: 32702-000400-200-RS)</b>	
120W Power adapter <i>Adapter Power;FSP;FSP150-ABAN3;9NA1504811;Active</i> <i>PFC;Vin:90~264VAC;150W;Dim:75.6*151.3*25.4mm;Plug=6.5mm;</i> <i>Cable=1500mm;Erp(NO LOAD 0.15W);Vout:19VDC;Din</i> <i>4Pin/lock;CCL;RoHS</i> <b>(P/N: 63040-010120-300-RS)</b>	
150W Power adapter <i>Adapter Power;FSP;FSP150-ABAN3;9NA1504811;Active</i> <i>PFC;Vin:90~264VAC;150W;Dim:75.6*151.3*25.4mm;Plug=6.5mm;</i> <i>Cable=1500mm</i> <i>;Erp(NO LOAD 0.15W);Vout:19VDC;Din 4Pin/lock;CCL;RoHS</i> <b>(P/N: 63040-010150-700-RS)</b>	

## TANK-870-Q170 Embedded System

Optional	
<p>Fan-</p> <p>63040-010120-300-RSFan Module;MODIFY</p> <p>31100-000272-RS;+12V</p> <p>DC;4PIN;40*40*15mm ;STANDARD;;FD124015LB2W3;; L=400mm MOLEX 5051-04P</p> <p>P=2.54;CCL;RoHS</p> <p>(P/N: EMB-FAN-KIT02-R10)</p>	
<p>IPMI 2.0 adapter card with AST2400 BMC chip for DDR3 SO-DIMM socket interface</p> <p>(P/N: iRIS-2400-R10)</p>	
<p>1T1R wifi module kit for embedded system, IEEE802.11a/b/g/n/ac WiFi with Bluetooth 4.0/3.0+HS, 1 x wifi module, 2 x 250 mm RF cable, 2 x Antenna, RoHS</p> <p>(P/N: EMB-WIFI-KIT01-R20)</p>

# Installation

---

### 3.1 Installation Precautions

During installation, be aware of the precautions below:

- **Read the user manual:** The user manual provides a complete description of the TANK-870-Q170 Series, installation instructions and configuration options.
- **DANGER! Disconnect Power:** Power to the TANK-870-Q170 Series must be disconnected during the installation process, or before any attempt is made to access the rear panel. Electric shock and personal injury might occur if the rear panel of the TANK-870-Q170 Series is opened while the power cord is still connected to an electrical outlet.
- **Qualified Personnel:** The TANK-870-Q170 Series must be installed and operated only by trained and qualified personnel. Maintenance, upgrades, or repairs may only be carried out by qualified personnel who are familiar with the associated dangers.
- **Air Circulation:** Make sure there is sufficient air circulation when installing the TANK-870-Q170 Series. The TANK-870-Q170 Series's cooling vents must not be obstructed by any objects. Blocking the vents can cause overheating of the TANK-870-Q170 Series. Leave at least 5 cm of clearance around the TANK-870-Q170 Series to prevent overheating.
- **Grounding:** The TANK-870-Q170 Series should be properly grounded. The voltage feeds must not be overloaded. Adjust the cabling and provide external overcharge protection per the electrical values indicated on the label attached to the back of the TANK-870-Q170 Series.

### 3.2 Hard Disk Drive (HDD) Installation

To install the hard drive, please follow the steps below:

- Step 1:** Loosen the two thumbscrews on the front panel, slide the cover outward, and then lift the cover up gently (**Figure 3-1**).

## TANK-870-Q170 Embedded System

**Figure 3-1: Unscrew the Cover**

**Step 2:** Unplug the SATA signal and power cables connected to the TANK-870-Q170 Series, and then put the cover on a flat surface (**Figure 3-2**).

**Figure 3-2: Remove the Cover from TANK-870-Q170 Series**

**Step 3:** Attach the HDD to the HDD bracket, and then slide the HDD to connect with the SATA connector (**Figure 3-3**).

**Figure 3-3: HDD Installation**

**Step 4:** Secure the HDD with the HDD bracket by four retention screws (**Figure 3-4**).

**Figure 3-4: HDD Retention Screws**

**Step 5:** Reconnect the SATA signal and power cables to the TANK-870-Q170 Series.

**Step 6:** Reinstall the cover.

## TANK-870-Q170 Embedded System

### 3.3 System Fan Installation

To install the optional system fan, please follow the steps below:

- Step 1:** Loosen the two thumbscrews on the front panel, slide the cover outward, and then lift the cover up gently (**Figure 3-1**).
- Step 2:** Unplug the SATA signal and power cables connected to the TANK-870-Q170 Series, and then place the cover on a flat surface (**Figure 3-2**).
- Step 3:** Attach the system fan to the TANK-870-Q170 Series and secure it by four retention screws (**Figure 3-5**).

**Figure 3-5: System Fan Installation**

- Step 4:** Connect the system fan cable to the **CPU\_FAN1** connector on the motherboard of TANK-870-Q170 Series.
- Step 5:** Reconnect the SATA signal and power cables to the TANK-870-Q170 Series.
- Step 6:** Reinstall the cover.

### 3.4 Mounting the System with Mounting Brackets

To mount the embedded system onto a wall or some other surface using the two mounting brackets, please follow the steps below.

**Step 1:** Turn the embedded system to the left side panel.

**Step 2:** Align the two retention screw holes in each bracket with the corresponding retention screw holes on the bottom surface or the left side panel (**Figure 3-6**).

#### Left Side Panel

**Figure 3-6: Mounting Bracket Retention Screws**

**Step 3:** Secure the brackets to the system by inserting two retention screws into each bracket (**Figure 3-6**).

**Step 4:** Drill holes in the intended installation surface.

**Step 5:** Align the mounting holes in the sides of the mounting brackets with the predrilled holes in the mounting surface.

**Step 6:** Insert four retention screws, two in each bracket, to secure the system to the wall.

## **TANK-870-Q170 Embedded System**

### **3.5 External Peripheral Interface Connectors**

The TANK-870-Q170 Series has the following connectors. Detailed descriptions of the connectors can be found in the subsections below.

- ACC mode switch
- AT/ATX power mode switch
- Audio
- Digital I/O
- HDMI+DP
- Ethernet
- Power DC jack
- Power terminal block
- RS-232
- RS-232/422/485
- USB
- VGA

3.5.1 ACC Mode Selection

The ACC mode is designed for vehicle applications. The TANK-870-Q170 Series allows turning the ACC mode on or off. The setting can be made through the ACC mode switch on the external peripheral interface panel as shown below.

Figure 3-7: ACC Mode Switch

## TANK-870-Q170 Embedded System

### 3.5.2 AT/ATX Power Mode Selection

The TANK-870-Q170 Series supports AT and ATX power modes. The setting can be made through the AT/ATX power mode switch on the external peripheral interface panel as shown below.

Figure 3-8: AT/ATX Power Mode Switch

### 3.5.3 Audio Connector

The audio jacks connect to external audio devices.

- **Line Out port (Green):** Connects to a headphone or a speaker. With multi-channel configurations, this port can also connect to front speakers.
- **Microphone (Pink):** Connects a microphone.

Figure 3-9: Audio Connector

### 3.5.4 Digital Input/Output Connector

The digital I/O connector provides programmable input and output for external devices. The pinout locations of the digital I/O connector are shown below.

Figure 3-10: DIO Connector

### 3.5.5 HDMI+DP Connector

The HDMI+DP connector can connect to an HDMI device or a DP device. The pinout locations of the digital I/O connector are shown below.

Figure 3-11: HDMI+DP Connector

### 3.5.6 LAN Connectors

The LAN connectors allow connection to an external network.

**Step 1:** **Locate the RJ-45 connectors.** The locations of the RJ-45 connectors are shown in **Figure 1-2**.

**Step 2:** **Align the connectors.** Align the RJ-45 connector on the LAN cable with one of the RJ-45 connectors on the TANK-870-Q170 Series. See **Figure 3-12**.

## TANK-870-Q170 Embedded System

Figure 3-12: LAN Connection

**Step 3:** Insert the LAN cable RJ-45 connector. Once aligned, gently insert the LAN cable RJ-45 connector into the on-board RJ-45 connector.

Figure 3-13: RJ-45 Ethernet Connector

The RJ-45 Ethernet connector has two status LEDs, one green and one yellow. The green LED indicates activity on the port and the yellow LED indicates the port is linked. See Table 3-1.

Activity/Link LED		Speed LED	
STATUS	DESCRIPTION	STATUS	DESCRIPTION
Off	No link	Off	10 Mbps connection
Yellow	Linked	Green	100 Mbps connection
Blinking	TX/RX activity	Orange	1 Gbps connection

Table 3-1: RJ-45 Ethernet Connector LEDs

### 3.5.7 Power Input, 3-pin Terminal Block

The power connector connects the leads of a 9 V~36 V DC power supply into the terminal block. Make sure that the power and ground wires are attached to the correct sockets of the connector.

Figure 3-14: 3-pin Terminal Block

### 3.5.8 Power Input, 4-pin DIN Connector

The power connector connects to the 9 V~36 V DC power adapter.

Figure 3-15: Power Input Connector

### 3.5.9 RJ-45 RS-232 Serial Ports

RS-232 serial port devices can be attached to the RJ-45 RS-232 serial ports on the rear panel by using the shipped RJ-45 to COM port cable.

**Step 1: Locate the RJ-45 RS-232 connectors.** The locations of the RJ-45 RS-232 connectors are shown in **Figure 1-2**.

**Step 2: Insert the RJ-45 connector.** Insert the RJ-45 connector on the RJ-45 to DB-9 COM port cable to one of the RJ-45 RS-232 connectors on the TANK-870-Q170 Series. See **Figure 3-16**.

## TANK-870-Q170 Embedded System

Figure 3-16: RJ-45 RS-232 Serial Device Connection

**Step 3: Insert the serial connector.** Insert the DB-9 connector of a serial device into the DB-9 connector on the RJ-45 to DB-9 COM port cable.

**Step 4: Secure the connector.** Secure the serial device connector to the external interface by tightening the two retention screws on either side of the connector.

The pinouts of the DB-9 male connector of the RJ-45 to COM port cable are listed below:

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	DCD	6	DSR
2	RX	7	RTS
3	TX	8	DSR
4	DTR	9	DCD
5	GND		

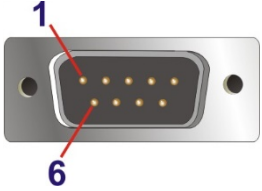

Table 3-2: RJ-45 to COM Port Cable Connector Pinouts

### 3.5.10 DB-9 RS-232/422/485 Serial Port Connectors

DB-9 RS-232/422/485 serial port devices can be attached to the DB-9 ports on the rear panel.

**Step 1:** **Locate the DB-9 connector.** The locations of the DB-9 connectors are shown in **Figure 1-2**.

**Step 2:** **Insert the serial connector.** Insert the DB-9 connector of a serial device into the DB-9 connector on the external peripheral interface. See **Figure 3-17**.

Figure 3-17: Serial Device Connector

**Step 3:** **Secure the connector.** Secure the serial device connector to the external interface by tightening the two retention screws on either side of the connector.

Figure 3-18: DB-9 RS-232/422/485 Serial Port Connector

## TANK-870-Q170 Embedded System

### 3.5.11 USB Connectors

The USB ports are for connecting USB peripheral devices to the system.

**Step 1: Locate the USB connectors.** The locations of the USB connectors are shown in **Figure 1-2**.

**Step 2: Align the connectors.** Align the USB device connector with one of the connectors. See **Figure 3-19**.

**Figure 3-19: USB Device Connection**

**Step 3: Insert the device connector.** Once aligned, gently insert the USB device connector into the on-board connector.

### 3.5.12 VGA Connector

The VGA connector connects to a monitor that accepts VGA video input.

**Step 1: Locate the female DB-15 connector.** The location of the female DB-15 connector is shown in **Figure 1-2**.

**Step 2: Align the VGA connector.** Align the male DB-15 connector on the VGA screen cable with the female DB-15 connector on the external peripheral interface.

**Step 3: Insert the VGA connector** Once the connectors are properly aligned with, insert the male connector from the VGA screen into the female connector on the TANK-870-Q170 Series. See **Figure 3-20**.

**Figure 3-20: VGA Connector**

**Step 4: Secure the connector.** Secure the DB-15 VGA connector from the VGA monitor to the external interface by tightening the two retention screws on either side of the connector.

**Figure 3-21: VGA Connector**

## TANK-870-Q170 Embedded System

### 3.6 Internal Peripheral Interface Connectors

#### 3.6.1 iDP Module Installation

Through the IEI iDP converter cards, the iDP connector can support different display specifications, such as VGA, HDMI, DVI-D, LVDS and DisplayPort. To connect an iDP module to TANK-870-Q170 Series please follow the instructions below.

**Step 1:** Loosen the two thumbscrews on the front panel, slide the cover outward, and then lift the cover up gently (**Figure 3-1**).

**Step 2:** Locate the internal DisplayPort connector. The location of the internal DisplayPort connector is shown in **Figure 3-22**.

**Figure 3-22: Internal DisplayPort Connector Location**

**Step 3:** Secure the iDP module with the bracket by tightening the two retention screws on either side of the iDP module.

**Figure 3-23: iDP Module with Bracket**

**Step 4:** Connect the iDP module to the DisplayPort connector on the motherboard. See **Figure 3-24**.

**Figure 3-24: iDP Module Installation**

**Step 5:** Remove the retention screws on the expansion slot bracket. See **Figure 3-25**.

## TANK-870-Q170 Embedded System

**Figure 3-25: Remove Expansion Slot Bracket**

**Step 6:** Secure the iDP module with bracket to the system. See **Figure 3-26**.

**Figure 3-26: Secure iDP Module to System**

**Step 7:** Reinstall the cover.

**WARNING:**

Installing the iDP module will occupy one expansion slot.

The following table lists the iDP converter cards that can be installed to the system.

DisplayPort to HDMI converter board (for IEI iDP connector) (P/N: DP-HDMI-R10)	
DisplayPort to LVDS converter board (for IEI iDP connector) (P/N: DP-LVDS-R10)	
DisplayPort to VGA converter board (for IEI iDP connector) (P/N: DP-VGA-R10)	
DisplayPort to DVI-D converter board (for IEI iDP connector) (P/N: DP-DVI-R10)	
DisplayPort to DisplayPort converter board (for IEI iDP connector) (P/N: DP-DP-R10)	

**Table 3-3: iDP Converter Cards**

## TANK-870-Q170 Embedded System

### 3.7 Powering On/Off the System

#### WARNING:

Make sure a power supply with the correct input voltage is being fed into the system. Incorrect voltages applied to the system may cause damage to the internal electronic components and may also cause injury to the user.

- **Power on** the system: press the power button for 3 seconds
- **Power off** the system: press the power button for 6 seconds

Figure 3-27: Power Button

### 3.8 Power

There are two power connectors on the rear panel. Power 1 connector is a 3-pin terminal block that supports ACC On signal. Power 2 connector is a DIN connector that can directly connect to a power adapter. The supported power input voltages are:

- **Power 1 (terminal block):** 9 V ~ 36 V
- **Power 2 (DC jack):** 9 V ~ 36 V

Figure 3-28: Power Connectors

LED Indicator	Description
Power LED1 (Breathing Orange)	Standby mode.
Power LED2 (Solid blue)	Power-on mode.

Table 3-4: Power LED Indicators Description

**NOTE:**

The power LED turns off when the power cable is unplugged from the system.

### 3.8.1 ACC ON Mode

1. The TANK-870-Q170 Series supports single power input and also can be simultaneously connected to two power sources. When both power connectors are connected to power sources with 9 V~36 V power input, the one with higher voltage will supply power to the system.
2. If ACC signal is low, the system will not boot up. If ACC ON signal is high (9 V~36 V), the system will boot up and work normally.

## TANK-870-Q170 Embedded System

3. If ACC signal jumps from high to low during the power on process, the system will soft shut down and shut down the system power after 10s.
4. When Power 1 < 9 V and Power 2 < 9 V, the system will soft shut down and shut down the system power after 10s.

### 3.8.2 ACC OFF Mode

1. The TANK-870-Q170 Series supports single power input and also can be simultaneously connected to two power sources. When both power connectors are connected to power sources with 9 V~36 V power input, the one with higher voltage will supply power to the system.
2. When Power 1 < 9 V and Power 2 < 9 V, the system will soft shut down and shut down the system power after 10s.

# **System Motherboard**

---

## TANK-870-Q170 Embedded System

### 4.1 Overview

This chapter details all the jumpers and connectors of the system motherboard.

### 4.2 Board Layout

The figures below show all the connectors and jumpers of the system motherboard. The Pin 1 locations of the on-board connectors are also indicated in the diagram below.

Figure 4-1: System Motherboard (Front)

Figure 4-2: System Motherboard (Rear)

### 4.3 Internal Peripheral Connectors

The table below shows a list of the internal peripheral interface connectors on the system motherboard. Pinouts of these connectors can be found in the following sections.

Connector	Type	Label
Backplane power connector	4-pin wafer	JP1
Battery connector	2-pin wafer	BAT1
BIOS programming connector	6-pin wafer	JSPI1
CPU fan connector	4-pin wafer	CPU_FAN1
DDR4 SO-DIMM slots	DDR4 SO-DIMM slot	DIMM1, DIMM2
DisplayPort connector	20-pin box header	DP1
EC debug connector	20-pin FPC connector	CN4
EC programming connector	6-pin wafer	JSPI2
iRIS-2400 module slot	iRIS-2400 module slot	IPMI1
Keyboard and mouse connector	6-pin wafer	KB_MS1
LED connector	12-pin header	J2
PCIe Mini card	Full size	MPCIE1
PCIe Mini card	Half size	MPCIE2
SATA 6Gb/s drive connector	14-pin SATA connector	S_ATA1
SATA power connectors	2-pin wafer	CN2, CN3
TPM connector	20-pin header	TPM1
USB 3.0 (5Gb/s) connector	19-pin box header	USB3-1

# BIOS

---

## 5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

**NOTE:**

Some of the BIOS options may vary throughout the life cycle of the product and are subject to change without prior notice.

### 5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. Press the **DEL** or **F2** key as soon as the system is turned on or
2. Press the **DEL** or **F2** key when the “**Press DEL or F2 to enter SETUP**” message appears on the screen.

If the message disappears before the **DEL** or **F2** key is pressed, restart the computer and try again.

### 5.1.2 Using Setup

Use the arrow keys to highlight items, press **ENTER** to select, use the PageUp and PageDown keys to change entries, press **F1** for help and press **ESC** to quit. Navigation keys are shown in.

Key	Function
Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes
-	Decrease the numeric value or make changes

## TANK-870-Q170 Embedded System

Key	Function
Page Up key	Increase the numeric value or make changes
Page Dn key	Decrease the numeric value or make changes
Esc key	Main Menu – Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2	Previous values
F3	Load optimized defaults
F4	Save changes and Exit BIOS

**Table 5-1: BIOS Navigation Keys**

### 5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window press **Esc** or the **F1** key again.

### 5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, disconnect the onboard RTC battery for 3 seconds and re-connect the battery.

### 5.1.5 BIOS Menu Bar

The **menu bar** on top of the BIOS screen has the following main items:

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Boot – Changes the system boot configuration.
- Security – Sets User and Supervisor Passwords.
- Save & Exit – Selects exit options and loads default settings.

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

## 5.2 Main

The **Main** BIOS menu (**BIOS Menu 1**) appears when the **BIOS Setup** program is entered.

The **Main** menu gives an overview of the basic system information.

### BIOS Menu 1: Main

The Main menu has two user configurable fields:

#### ➔ System Date [xx/xx/xx]

Use the **System Date** option to set the system date. Manually enter the day, month and year.

#### ➔ System Time [xx:xx:xx]

Use the **System Time** option to set the system time. Manually enter the hours, minutes and seconds.

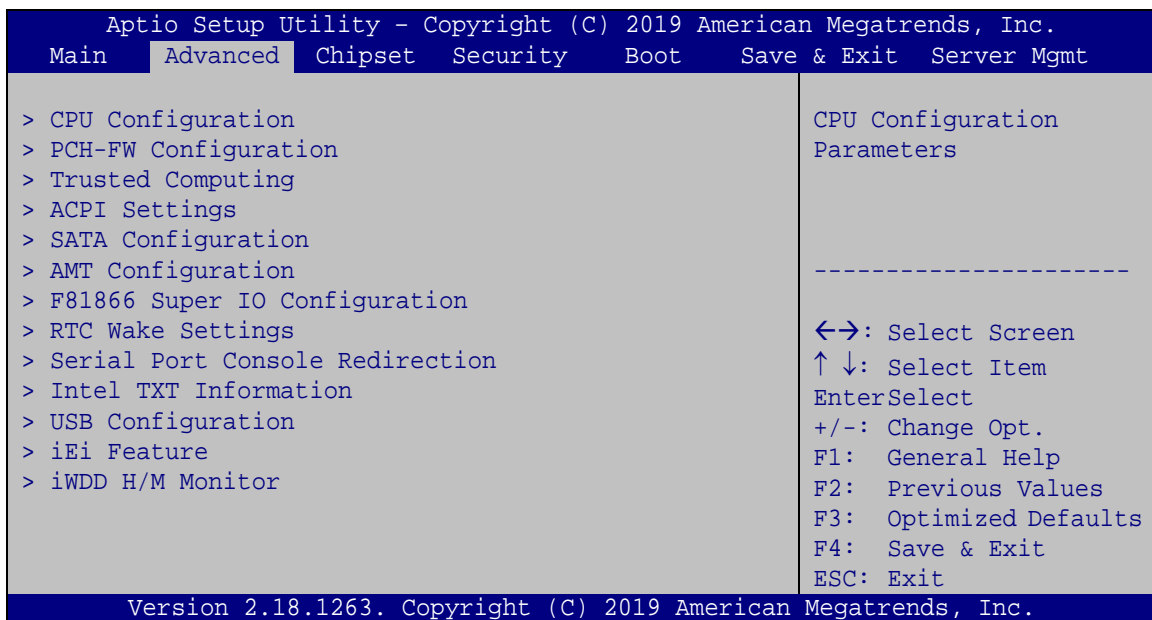

## TANK-870-Q170 Embedded System

## 5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 2**) to configure the CPU and peripheral devices through the following sub-menus:

**WARNING!**

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

**BIOS Menu 2: Advanced**

5.3.1 CPU Configuration

Use the **CPU Configuration** menu (**BIOS Menu 3**) to enter the **CPU Information** submenu or enable Intel Virtualization Technology.

Aptio Setup Utility - Copyright (C) 2019 American Megatrends, Inc.		
Advanced		
CPU Configuration		When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

BIOS Menu 3: CPU Configuration

➔ Intel (VMX) Virtualization Technology [Enabled]

Use the **Intel (VMX) Virtualization Technology** option to enable or disable virtualization on the system. When combined with third party software, Intel Virtualization technology allows several OSs to run on the same system at the same time.

- ➔ **Disabled** Disables Intel Virtualization Technology.
- ➔ **Enabled** **DEFAULT** Enables Intel Virtualization Technology.

## TANK-870-Q170 Embedded System

### → Active Processor Cores [All]

Use the **Active Processor Cores** option to configure the number of the active processor cores.

- |   |     |         |                                     |
|---|-----|---------|-------------------------------------|
| → | All | DEFAULT | Active all of the processor cores   |
| → | 1   |         | Active one of the processor cores   |
| → | 2   |         | Active two of the processor cores   |
| → | 3   |         | Active three of the processor cores |

### → EIST [Enabled]

Use the **EIST** option to enable or disable the Intel Speed Step Technology.

- |   |          |         |   |
|---|----------|---------|---|
| → | Disabled |         | Disables the Intel Speed Step Technology. |
| → | Enabled  | DEFAULT | Enables the Intel Speed Step Technology.  |

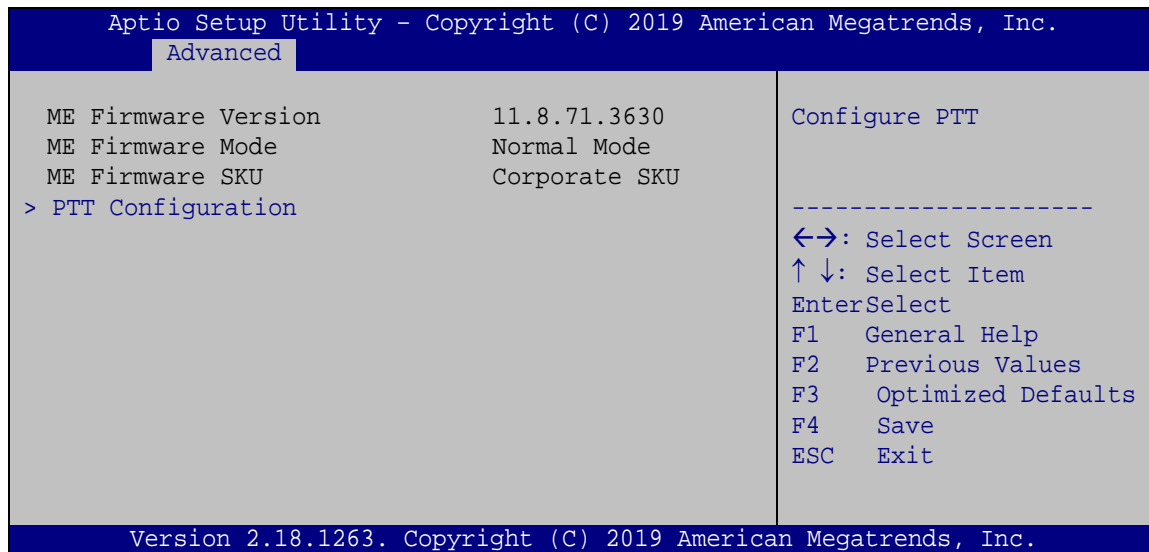

### → CPU C states [Disabled]

Use the **CPU C states** option to enable or disable CPU C states.

- |   |          |         |                        |
|---|----------|---------|------------------------|
| → | Enabled  |         | Enables CPU C states.  |
| → | Disabled | DEFAULT | Disables CPU C states. |

### 5.3.2 PCH-FW Configuration

The **PCH-FW Configuration** menu (**BIOS Menu 4**) allows Intel® Active Management Technology (AMT) options to be configured.

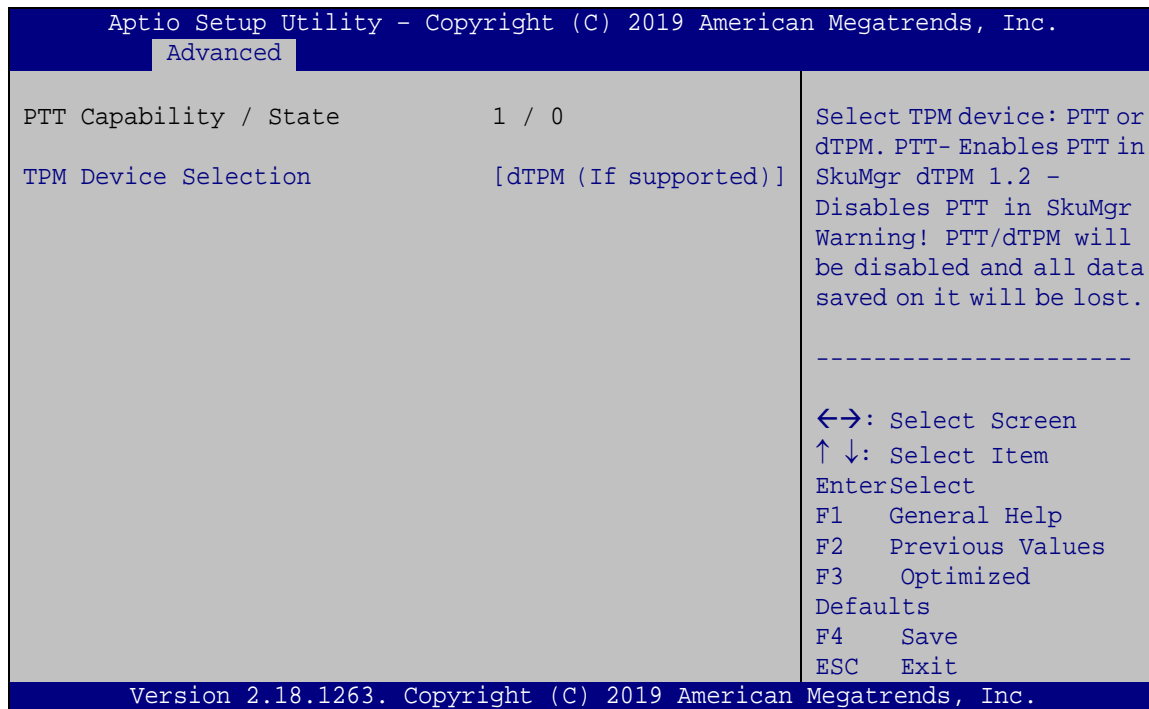

**BIOS Menu 4: PCH-FW Configuration**

## TANK-870-Q170 Embedded System

## 5.3.2.1 PTT Configuration

Use the **PTT Configuration** menu (**BIOS Menu 5**) to configure settings related to the Trusted Platform Module (TPM).

**BIOS Menu 5: PTT Configuration**➔ **TPM Device Selection [dTPM (If supported)]**

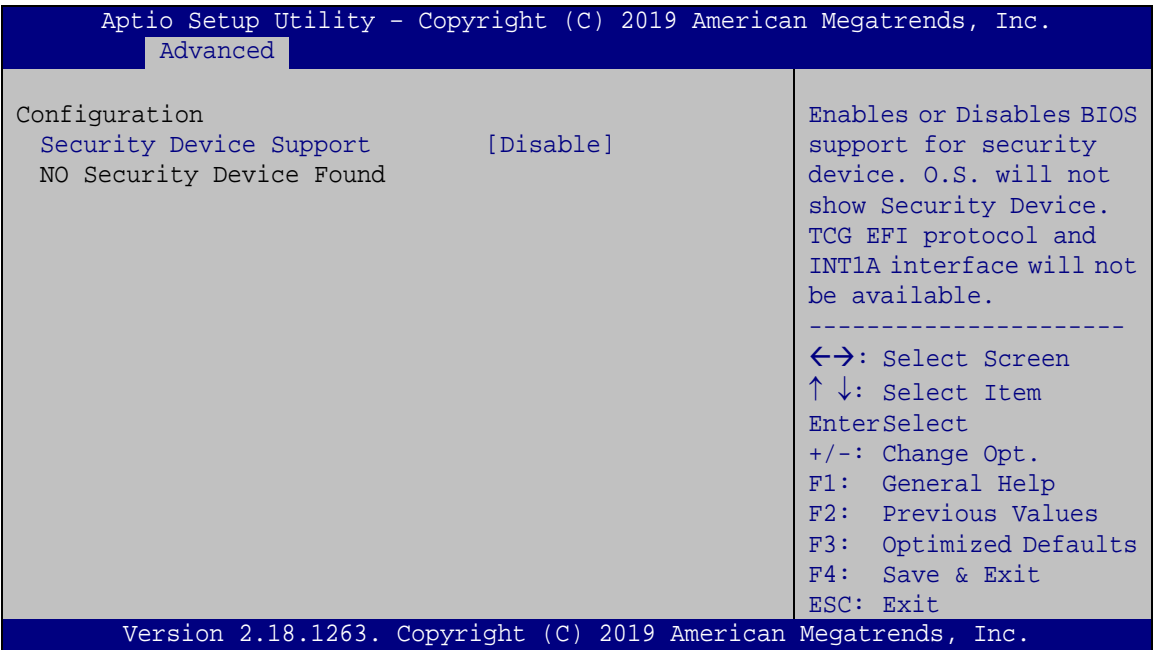

Use the **TPM Device Selection** option to configure support for the TPM.

- ➔ **dTPM** (If **DEFAULT** Disable PTT in SkuMgr.  
supported)
- ➔ **PTT** Enable PTT in SkuMgr

5.3.3 Trusted Computing

Use the **Trusted Computing** menu (**BIOS Menu 6**) to configure settings related to the Trusted Computing Group (TCG) Trusted Platform Module (TPM).

BIOS Menu 6: Trusted Computing

➔ Security Device Support [Disable]

Use the **Security Device Support** option to configure support for the security device.

- ➔ **Disable**    **DEFAULT**    Security device support is disabled.
- ➔ **Enable**                      Security device support is enabled.

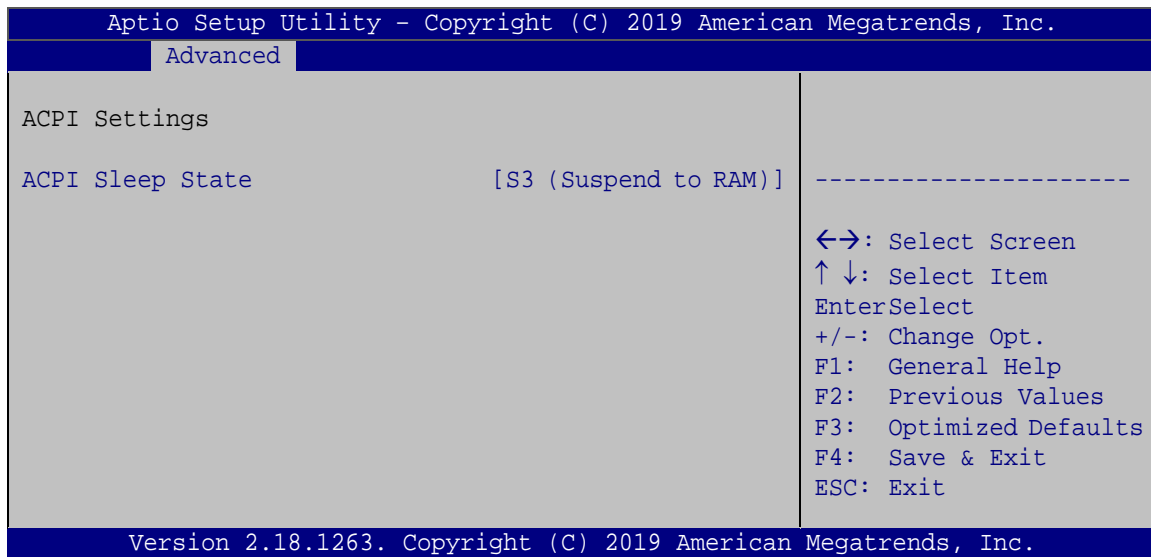

## TANK-870-Q170 Embedded System

### 5.3.4 ACPI Settings

The **ACPI Settings** menu (**BIOS Menu 7**) configures the Advanced Configuration and Power Interface (ACPI) options.

#### BIOS Menu 7: ACPI Configuration

##### → **ACPI Sleep State [S3 (Suspend to RAM)]**

Use the **ACPI Sleep State** option to specify the sleep state the system enters when it is not being used.

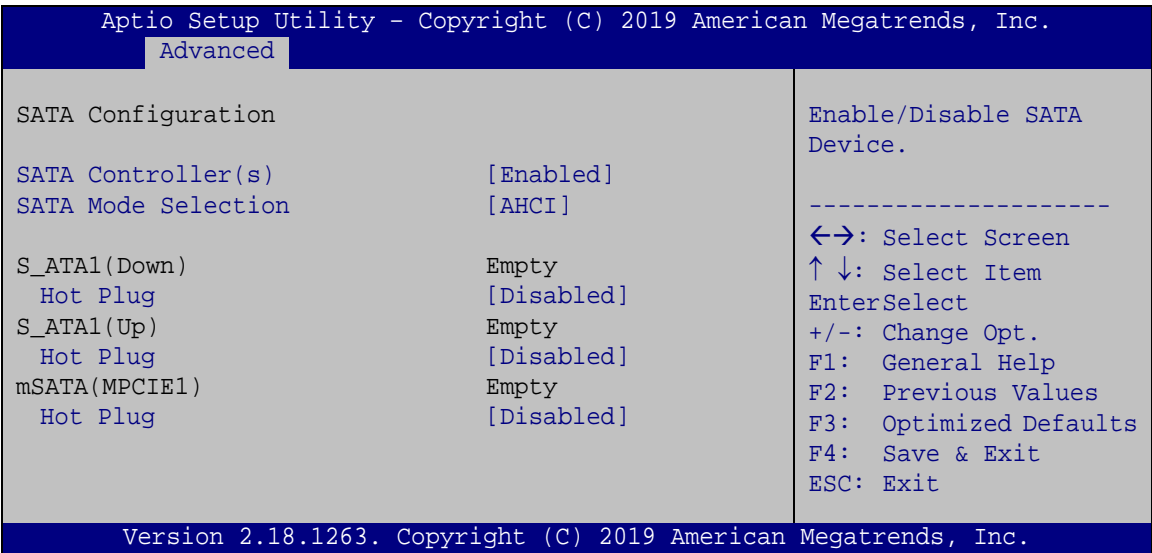

##### → **S3 (Suspend to RAM)**

The caches are flushed and the CPU is powered off. Power to the RAM is maintained. The computer returns slower to a working state, but more power is saved.

5.3.5 SATA Configuration

Use the **SATA Configuration** menu (**BIOS Menu 8**) to change and/or set the configuration of the SATA devices installed in the system.

BIOS Menu 8: SATA Configuration

➔ **SATA Controller(s) [Enabled]**

Use the **SATA Controller(s)** option to configure the serial ATA controller.

- ➔ **Enabled**      **DEFAULT**      Enables the on-board SATA controller.
- ➔ **Disabled**                      Disables the on-board SATA controller.

➔ **SATA Mode Selection [AHCI]**

Use the **SATA Selection Mode** option to configure SATA devices.

- ➔ **AHCI**      **DEFAULT**      Configures SATA devices as AHCI device.
- ➔ **RAID**                      Configures SATA devices as RAID device.

## TANK-870-Q170 Embedded System

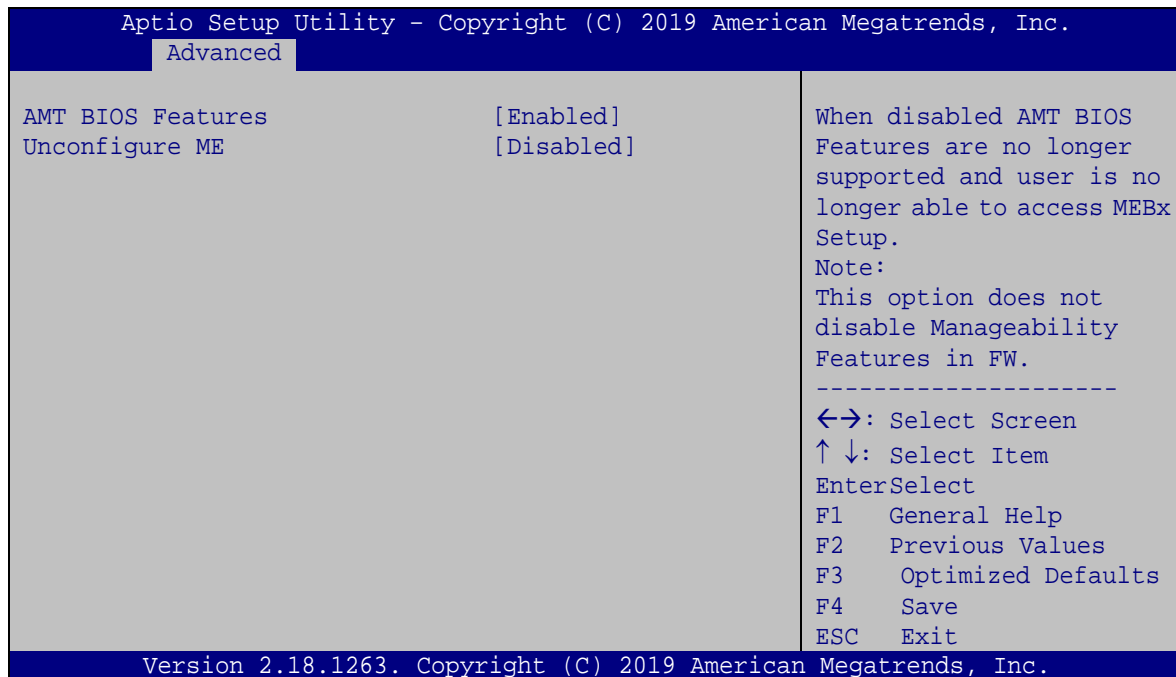

### → Hot Plug [Disabled]

Use the **Hot Plug** option to enable or disable the hot plug function.

- **Disabled**      **DEFAULT**      Disables the hot plug function.
- **Enabled**                      Enables the hot plug function.

### 5.3.6 AMT Configuration

The **AMT Configuration** menu (**BIOS Menu 9**) allows the advanced power management options to be configured.

#### BIOS Menu 9: AMT Configuration

### → AMT BIOS Features [Enabled]

Use **AMT BIOS Features** option to enable or disable the Intel® AMT function.

- **Disabled**                      Intel® AMT is disabled
- **Enabled**      **DEFAULT**      Intel® AMT is enabled

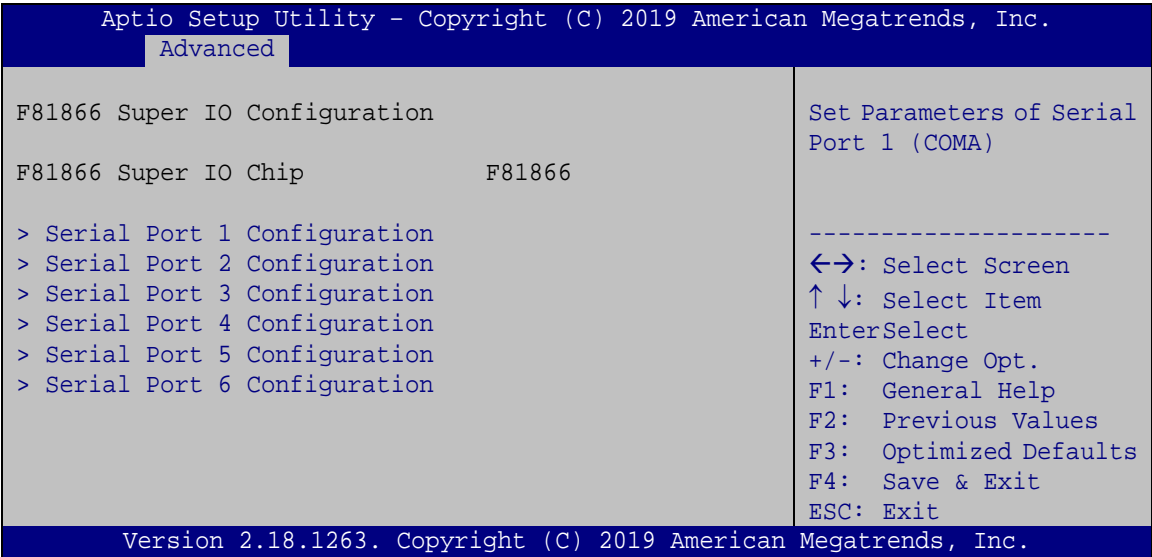

➔ **Unconfigure ME [Disabled]**

Use the **Unconfigure ME** option to perform ME unconfigure without password operation.

- ➔ **Disabled**      **DEFAULT**      Not perform ME unconfigure
- ➔ **Enabled**                      To perform ME unconfigure

**5.3.7 F81866 Super IO Configuration**

Use the **F81866 Super IO Configuration** menu (**BIOS Menu 10**) to set or change the configurations for the serial ports.

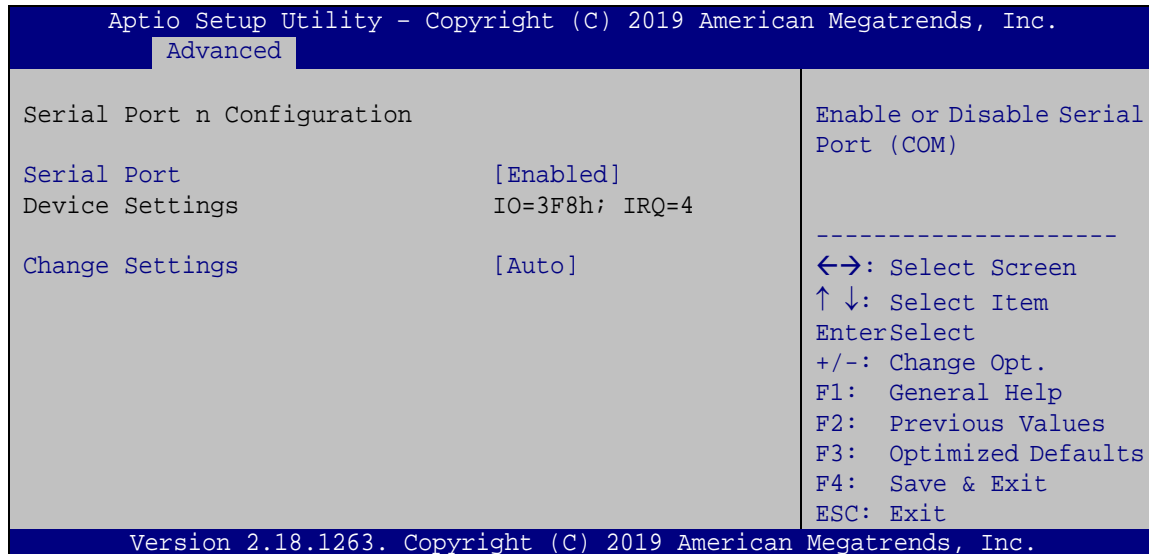

**BIOS Menu 10: F81866 Super IO Configuration**

## TANK-870-Q170 Embedded System

## 5.3.7.1 Serial Port n Configuration

Use the **Serial Port n Configuration** menu (**BIOS Menu 11**) to configure the serial port n.

**BIOS Menu 11: Serial Port n Configuration Menu**

## 5.3.7.1.1 Serial Port 1 Configuration

## ➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled** **DEFAULT** Enable the serial port

## ➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ **IO=3F8h; IRQ=4** Serial Port I/O port address is 3F8h and the interrupt address is IRQ4

## TANK-870-Q170 Embedded System

- |                                      |   |
|--------------------------------------|---|
| ➔ IO=3F8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 3F8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ IO=2F8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ IO=3E8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ IO=2E8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |

### 5.3.7.1.2 Serial Port 2 Configuration

➔ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

- |                          |                         |
|--------------------------|-------------------------|
| ➔ Disabled               | Disable the serial port |
| ➔ Enabled <b>DEFAULT</b> | Enable the serial port  |

➔ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- |                                      |   |
|--------------------------------------|---|
| ➔ Auto <b>DEFAULT</b>                | The serial port IO port address and interrupt address are automatically detected.       |
| ➔ IO=2F8h; IRQ=3                     | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3                  |
| ➔ IO=3F8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 3F8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ IO=2F8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ IO=3E8h; IRQ=3,<br>4, 7, 9, 10, 11 | Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |

## TANK-870-Q170 Embedded System

- ➔ **IO=2E8h; IRQ=3,**  
4, 7, 9, 10, 11

Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11

### 5.3.7.1.3 Serial Port 3 Configuration

#### ➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled** **DEFAULT** Enable the serial port

#### ➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ **IO=3E8h; IRQ=10** Serial Port I/O port address is 3E8h and the interrupt address is IRQ10
- ➔ **IO=3E8h; IRQ=3,**  
4, 7, 9, 10, 11 Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ **IO=2E8h; IRQ=3,**  
4, 7, 9, 10, 11 Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ **IO=3E0h; IRQ=3,**  
4, 7, 9, 10, 11 Serial Port I/O port address is 3E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ **IO=2E0h; IRQ=3,**  
4, 7, 9, 10, 11 Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11

5.3.7.1.4 Serial Port 4 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ Disabled Disable the serial port
- ➔ Enabled **DEFAULT** Enable the serial port

➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ Auto **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ IO=2E8h; IRQ=10 Serial Port I/O port address is 2E8h and the interrupt address is IRQ10
- ➔ IO=3E8h; IRQ=3, 4, 7, 9, 10, 11 Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ IO=2E8h; IRQ=3, 4, 7, 9, 10, 11 Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ IO=3E0h; IRQ=3, 4, 7, 9, 10, 11 Serial Port I/O port address is 3E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
- ➔ IO=2E0h; IRQ=3, 4, 7, 9, 10, 11 Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11

5.3.7.1.5 Serial Port 5 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ Disabled Disable the serial port

## TANK-870-Q170 Embedded System

➔ **Enabled**      **DEFAULT**      Enable the serial port

➔ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

➔	<b>Auto</b>	<b>DEFAULT</b>	The serial port IO port address and interrupt address are automatically detected.
➔	<b>IO=3E0h; IRQ=10</b>		Serial Port I/O port address is 3E0h and the interrupt address is IRQ10
➔	<b>IO=3E8h; IRQ=3, 4, 7, 9, 10, 11</b>		Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
➔	<b>IO=2E8h; IRQ=3, 4, 7, 9, 10, 11</b>		Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
➔	<b>IO=3E0h; IRQ=3, 4, 7, 9, 10, 11</b>		Serial Port I/O port address is 3E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11
➔	<b>IO=2E0h; IRQ=3, 4, 7, 9, 10, 11</b>		Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11

➔ **Device Mode [RS232]**

Use the **Device Mode** option to select the serial port mode.

➔	<b>RS232</b>	<b>DEFAULT</b>	Enables serial port RS-232 support.
➔	<b>RS422</b>		Enables serial port RS-422 support.
➔	<b>RS485</b>		Enables serial port RS-485 support.

5.3.7.1.6 Serial Port 6 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- |   |          |         |                         |
|---|----------|---------|-------------------------|
| ➔ | Disabled |         | Disable the serial port |
| ➔ | Enabled  | DEFAULT | Enable the serial port  |

➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- |   |                                 |         |   |
|---|---------------------------------|---------|---|
| ➔ | Auto                            | DEFAULT | The serial port IO port address and interrupt address are automatically detected.       |
| ➔ | IO=2E0h; IRQ=10                 |         | Serial Port I/O port address is 2E0h and the interrupt address is IRQ10                 |
| ➔ | IO=3E8h; IRQ=3, 4, 7, 9, 10, 11 |         | Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ | IO=2E8h; IRQ=3, 4, 7, 9, 10, 11 |         | Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ | IO=3E0h; IRQ=3, 4, 7, 9, 10, 11 |         | Serial Port I/O port address is 3E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |
| ➔ | IO=2E0h; IRQ=3, 4, 7, 9, 10, 11 |         | Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 7, 9, 10, 11 |

➔ Device Mode [RS232]

Use the **Device Mode** option to select the serial port mode.

- |   |       |         |                                     |
|---|-------|---------|-------------------------------------|
| ➔ | RS232 | DEFAULT | Enables serial port RS-232 support. |
| ➔ | RS422 |         | Enables serial port RS-422 support. |
| ➔ | RS485 |         | Enables serial port RS-485 support. |

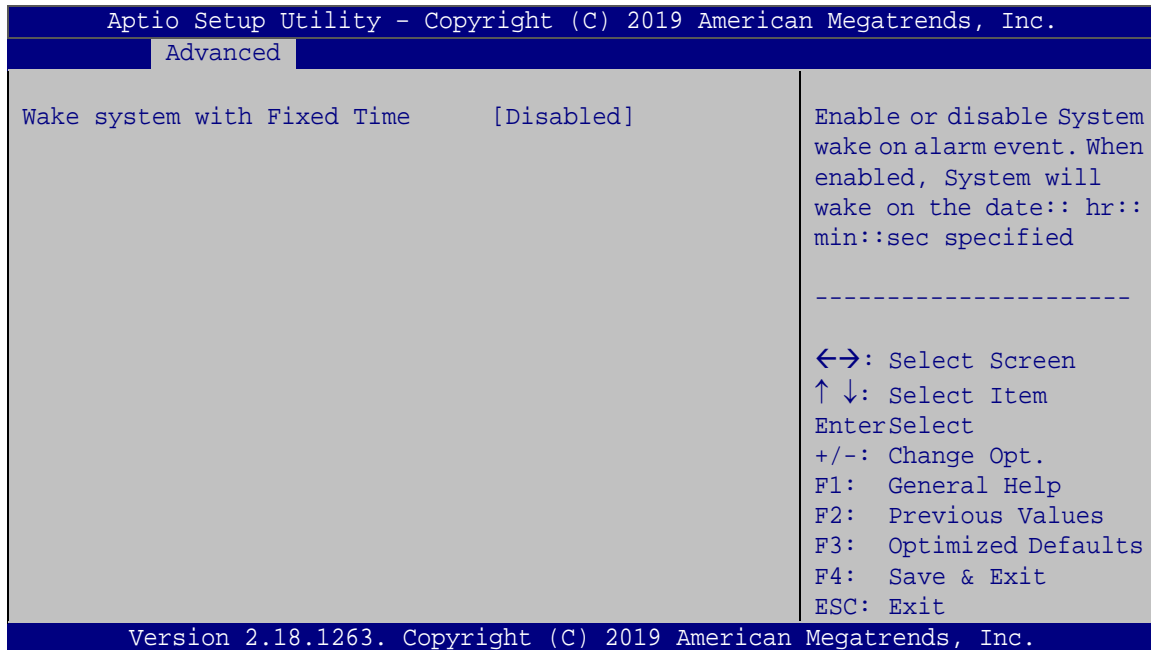

## TANK-870-Q170 Embedded System

## 5.3.8 RTC Wake Settings

The **RTC Wake Settings** menu (**BIOS Menu 12**) configures RTC wake event.

**BIOS Menu 12: RTC Wake Settings**➔ **Wake System with Fixed Time [Disabled]**

Use the **Wake System with Fixed Time** option to specify the time the system should be roused from a suspended state.

➔ **Disabled**      **DEFAULT**      The real time clock (RTC) cannot generate a wake event

➔ **Enabled**      If selected, the following appears with values that can be selected:

\*Wake up every day

\*Wake up date

\*Wake up hour

\*Wake up minute

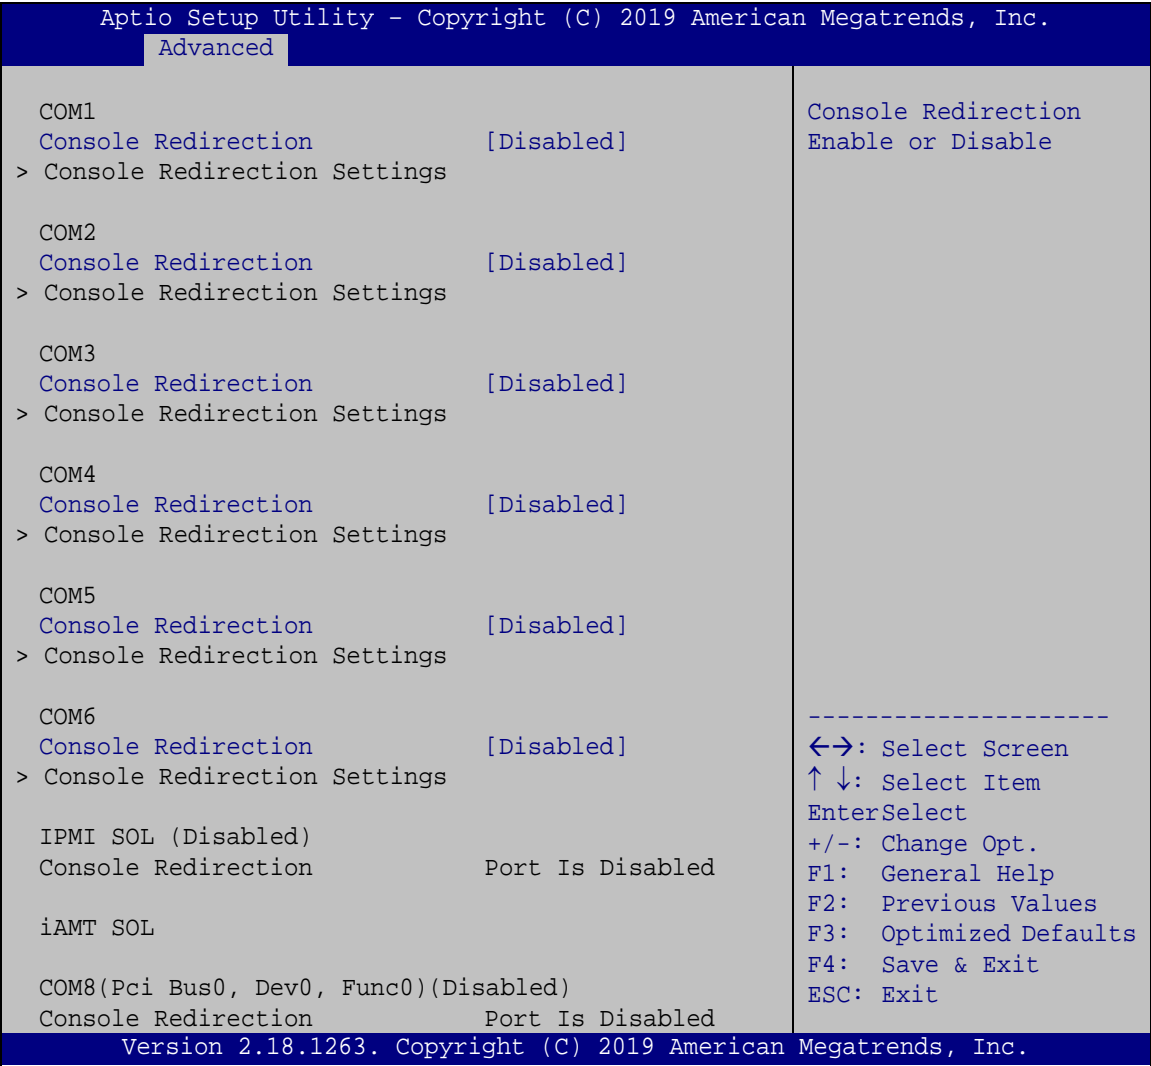

\*Wake up second

After setting the alarm, the computer turns itself on from a suspend state when the alarm goes off.

5.3.9 Serial Port Console Redirection

The **Serial Port Console Redirection** menu (**BIOS Menu 13**) allows the console redirection options to be configured. Console redirection allows users to maintain a system remotely by re-directing keyboard input and text output through the serial port.

BIOS Menu 13: Serial Port Console Redirection

➔ Console Redirection [Disabled]

Use **Console Redirection** option to enable or disable the console redirection function.

➔     **Disabled**     **DEFAULT**     Disabled the console redirection function

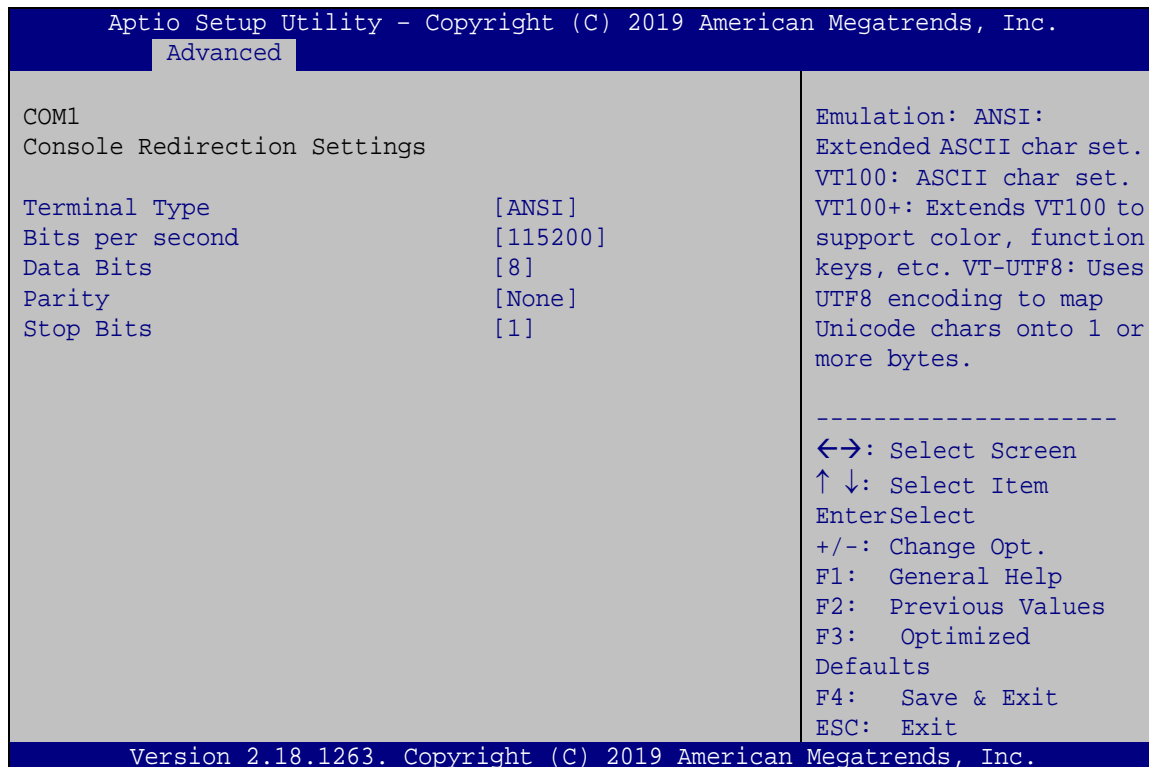

## TANK-870-Q170 Embedded System

➔ **Enabled** Enabled the console redirection function

## 5.3.9.1 Console Redirection Settings

The **Console Redirection Settings** menu (**BIOS Menu 14**) allows the console redirection options to be configured. The option is active when Console Redirection option is enabled.

## BIOS Menu 14: Console Redirection Settings

➔ **Terminal Type [ANSI]**

Use the **Terminal Type** option to specify the remote terminal type..

- ➔ **VT100** The target terminal type is VT100
- ➔ **VT100+** The target terminal type is VT100+
- ➔ **VT-UTF8** The target terminal type is VT-UTF8
- ➔ **ANSI** **DEFAULT** The target terminal type is ANSI

**→ Bits per second [115200]**

Use the **Bits per second** option to specify the transmission speed of the serial port.

- |   |        |         |                                  |
|---|--------|---------|----------------------------------|
| → | 9600   |         | The transmission speed is 9600   |
| → | 19200  |         | The transmission speed is 19200  |
| → | 38400  |         | The transmission speed is 38400  |
| → | 57600  |         | The transmission speed is 57600  |
| → | 115200 | DEFAULT | The transmission speed is 115200 |

**→ Data Bits [8]**

Use the **Data Bits** option to specify the number of data bits.

- |   |   |         |                          |
|---|---|---------|--------------------------|
| → | 7 |         | Sets the data bits at 7. |
| → | 8 | DEFAULT | Sets the data bits at 8. |

**→ Parity [None]**

Use the **Parity** option to specify the parity bit that can be sent with the data bits for detecting the transmission errors.

- |   |       |         |   |
|---|-------|---------|---|
| → | None  | DEFAULT | No parity bit is sent with the data bits.                                 |
| → | Even  |         | The parity bit is 0 if the number of ones in the data bits is even.       |
| → | Odd   |         | The parity bit is 0 if the number of ones in the data bits is odd.        |
| → | Mark  |         | The parity bit is always 1. This option does not provide error detection. |
| → | Space |         | The parity bit is always 0. This option does not provide error detection. |

## TANK-870-Q170 Embedded System

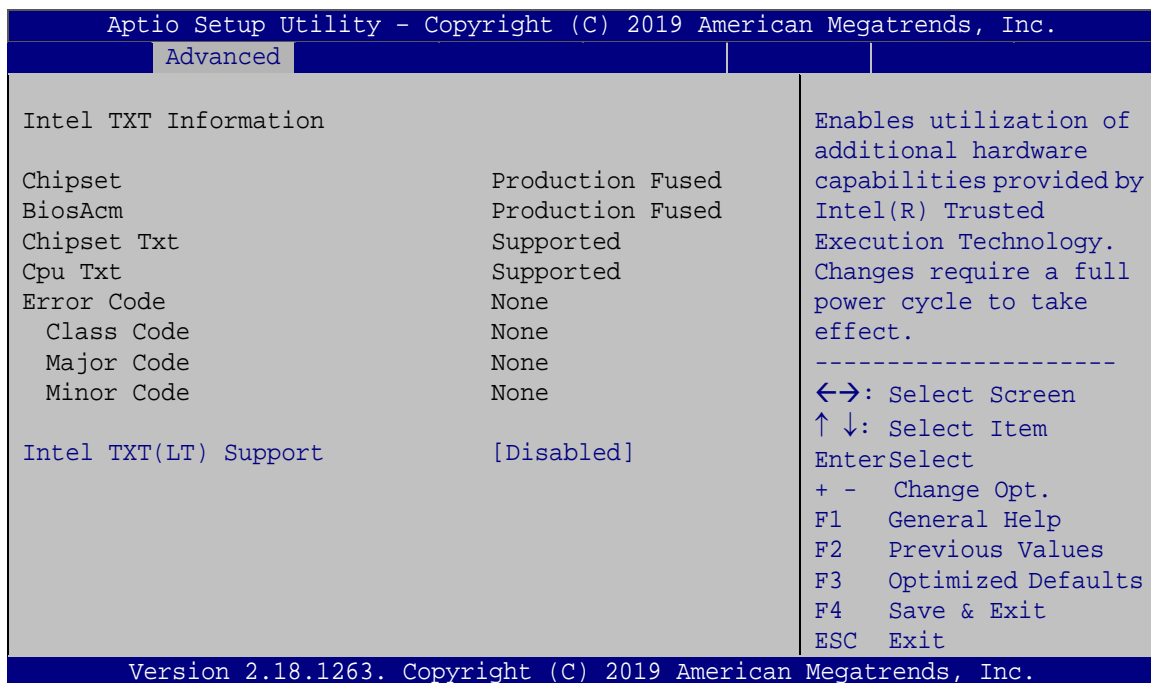

### → Stop Bits [1]

Use the **Stop Bits** option to specify the number of stop bits used to indicate the end of a serial data packet. Communication with slow devices may require more than 1 stop bit.

- 1                      **DEFAULT**      Sets the number of stop bits at 1.
- 2                                      Sets the number of stop bits at 2.

### 5.3.10 Intel TXT Information

Use the **Intel TXT Information** menu to configure Intel Trusted Execution Technology support.

#### BIOS Menu 15: Intel TXT Information

### → Intel TXT (LT) Support [Disabled]

Use the **Intel TXT (LT) Support** option to enable or disable the Intel® Trusted Execution Technology.

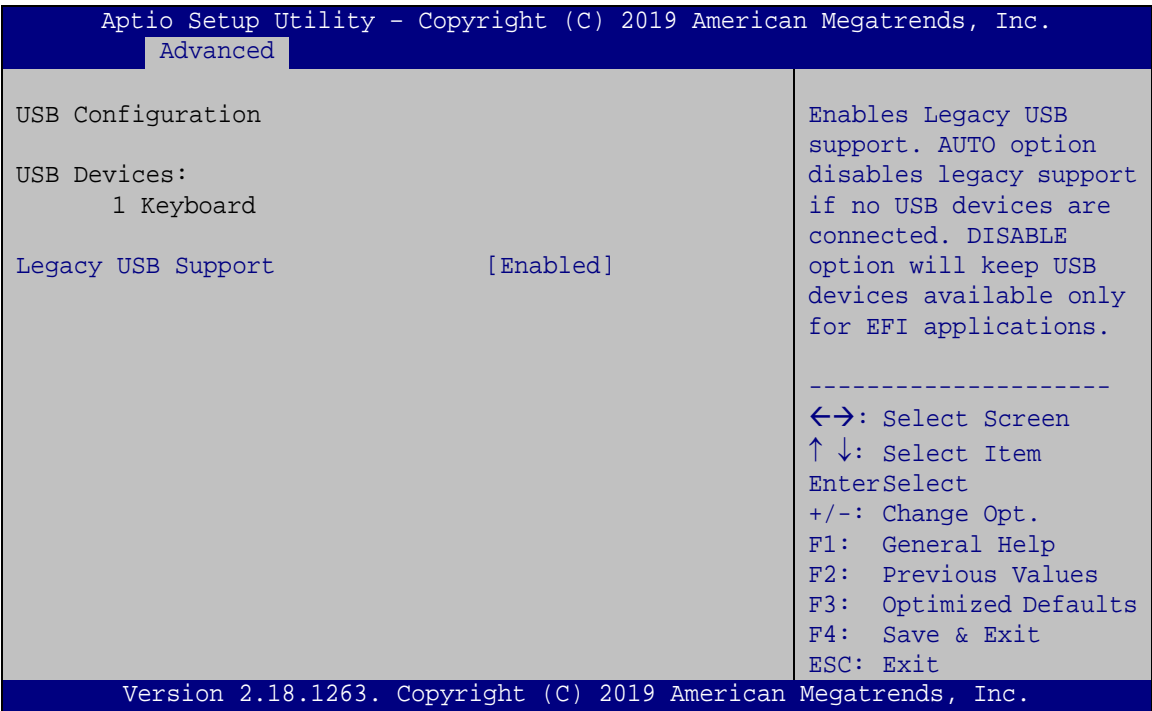

- **Disabled**                      **DEFAULT**      Disable Intel® Trusted Execution Technology
- **Enabled**                                      Enable Intel® Trusted Execution Technology

5.3.11 USB Configuration

Use the **USB Configuration** menu (**BIOS Menu 16**) to read USB configuration information and configure the USB settings.

BIOS Menu 16: USB Configuration

➔ **USB Devices**

The **USB Devices** field lists the USB devices that are enabled on the system

➔ **Legacy USB Support [Enabled]**

Use the **Legacy USB Support** BIOS option to enable USB mouse and USB keyboard support. Normally if this option is not enabled, any attached USB mouse or USB keyboard does not become available until a USB compatible operating system is fully booted with all USB drivers loaded. When this option is enabled, any attached USB mouse or USB keyboard can control the system even when there is no USB driver loaded onto the system.

➔    **Enabled**        **DEFAULT**        Legacy USB support enabled

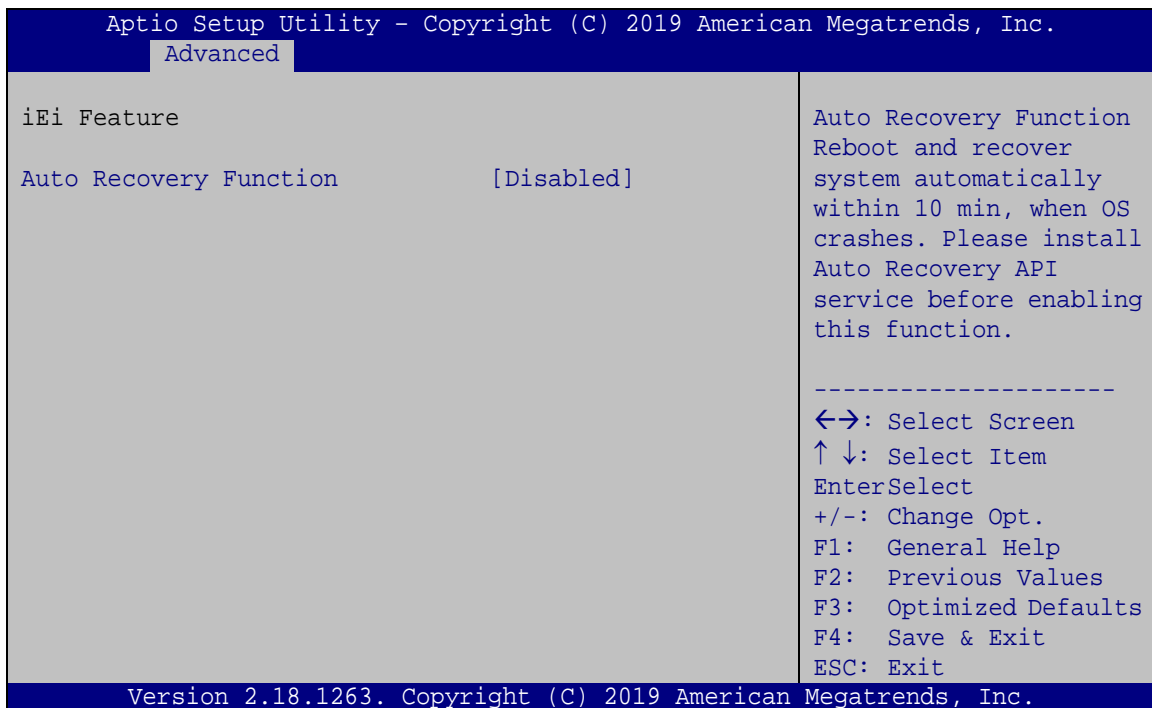

## TANK-870-Q170 Embedded System

- ➔ **Disabled** Legacy USB support disabled
- ➔ **Auto** Legacy USB support disabled if no USB devices are connected

### 5.3.12 iEi Feature

Use the **iEi Feature** menu (**BIOS Menu 17**) to configure the iEi features.

#### BIOS Menu 17: iEi Feature

##### ➔ **Auto Recovery Function [Disabled]**

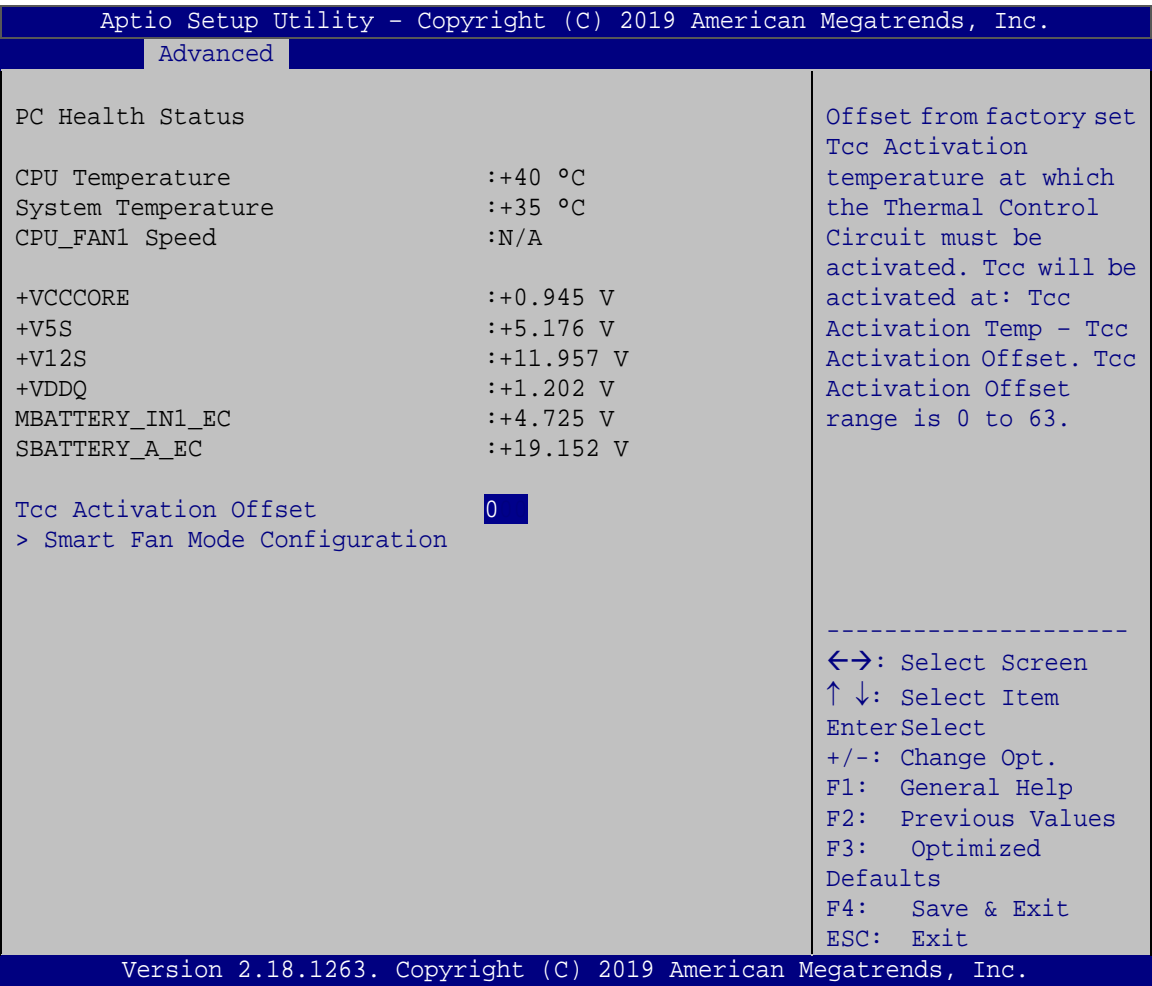

Use **Auto Recovery Function** option to enable or disable the auto recovery function.

- ➔ **Disabled**      **DEFAULT**      Disabled the auto recovery function
- ➔ **Enabled**      Enabled the auto recovery function

5.3.13 iWDD H/W Monitor

The **iWDD H/W Monitor** menu (**BIOS Menu 18**) shows the operating temperature, fan speeds and system voltages.

BIOS Menu 18: F81866 H/W Monitor

➔ PC Health Status

The following system parameters and values are shown. The system parameters that are monitored are:

- System Temperatures:
  - CPU Temperature
  - System Temperature
- Fan Speeds:

## TANK-870-Q170 Embedded System

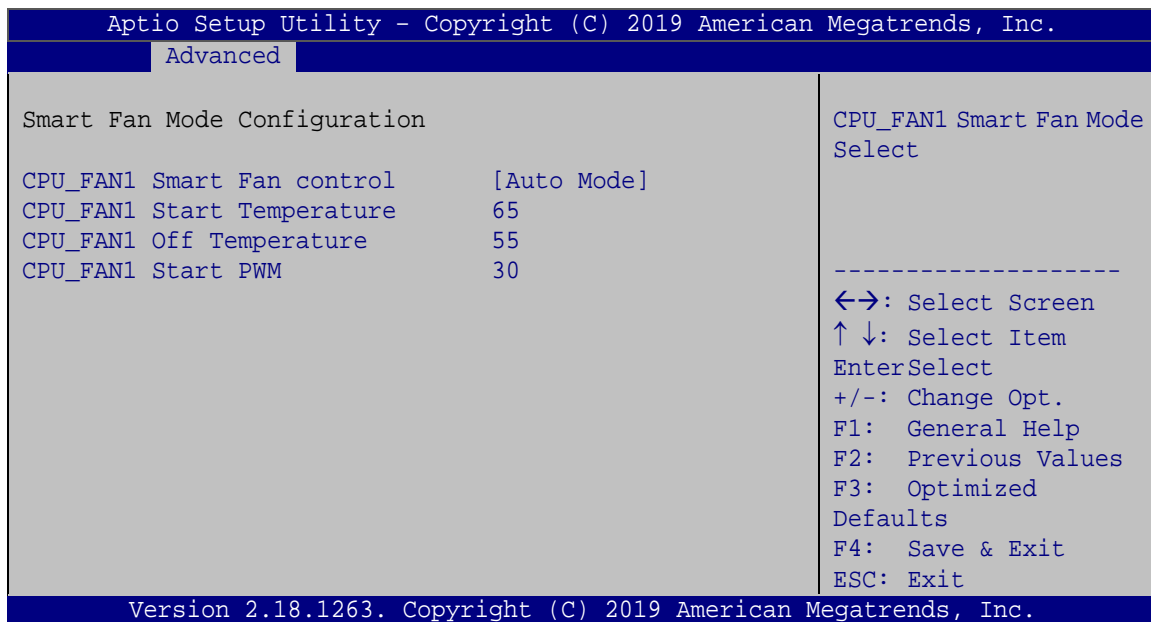

- CPU\_Fan1 Speed
- Voltages:
  - +VCCCORE
  - +V5S
  - +V12S
  - +VDDQ
  - MBATTERY\_IN1\_EC
  - SBATTERY\_A\_EC

### ➔ Tcc Activation Offset [Enabled]

Offset from default value of Thermal Control Circuit (TCC) activation temperature at which the TCC must be activated. TCC Activation Offset range is 0 to 63.

### 5.3.13.1 Smart Fan Mode Configuration

Use the **Smart Fan Mode Configuration** submenu (**BIOS Menu 19**) to configure the smart fan temperature and speed settings.

**BIOS Menu 19: Smart Fan Mode Configuration**

➔ **Smart Fan control [Auto Mode]**

Use the **Smart Fan control** BIOS option to configure the CPU Smart Fan.

- |   |                    |                |   |
|---|--------------------|----------------|---|
| ➔ | <b>Manual Mode</b> |                | The fan spins at the speed set in the manual setting  |
| ➔ | <b>Auto Mode</b>   | <b>DEFAULT</b> | The fan adjusts its speed using these settings:<br>CPU_FAN1 Start Temperature<br>CPU_FAN1 Off Temperature<br>CPU_FAN1 Start PWM |

➔ **CPU\_FAN1 Start/Off Temperature**

Use the + or – key to change the **CPU\_FAN1 Start/Off Temperature** value. Enter a decimal number between 1 and 100.

➔ **CPU\_FAN1 start PWM**

Use the + or – key to change the **CPU\_FAN1 start PWM** value. Enter a decimal number between 1 and 100.

5.4 Chipset

Use the **Chipset** menu (**BIOS Menu 20**) to access the PCH-IO and System Agent (SA) configuration menus.

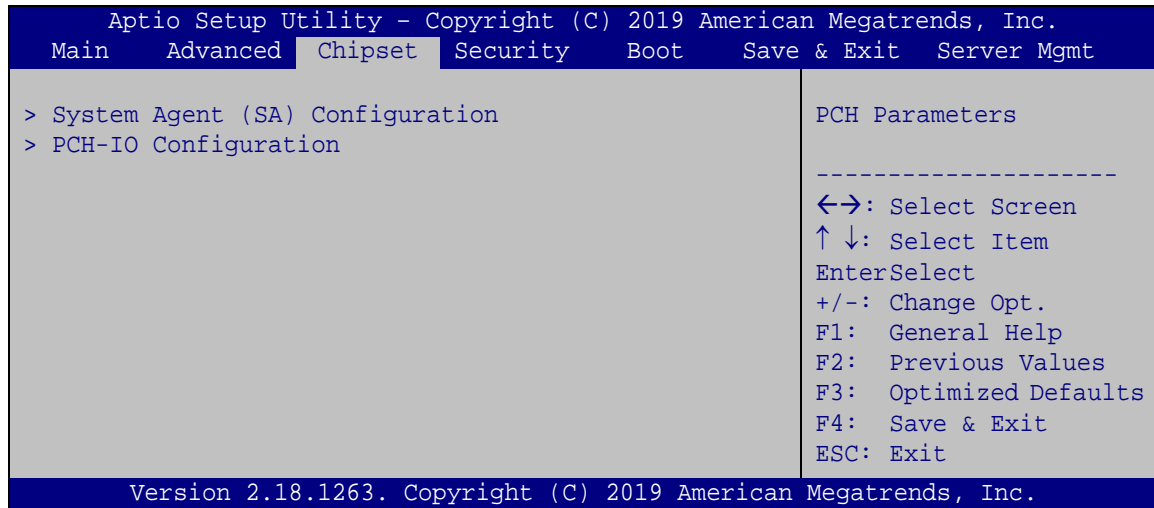

**WARNING!**

Setting the wrong values for the Chipset BIOS selections in the Chipset BIOS menu may cause the system to malfunction.

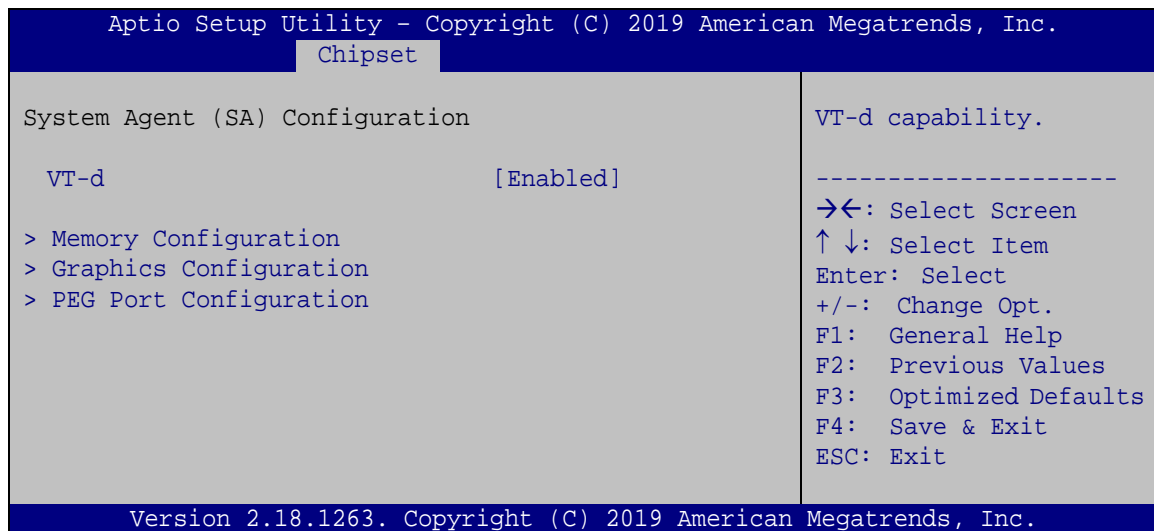

## TANK-870-Q170 Embedded System

BIOS Menu 20: Chipset

## 5.4.1 System Agent (SA) Configuration

Use the **System Agent (SA) Configuration** menu (**BIOS Menu 21**) to configure the System Agent (SA) parameters.

BIOS Menu 21: System Agent (SA) Configuration

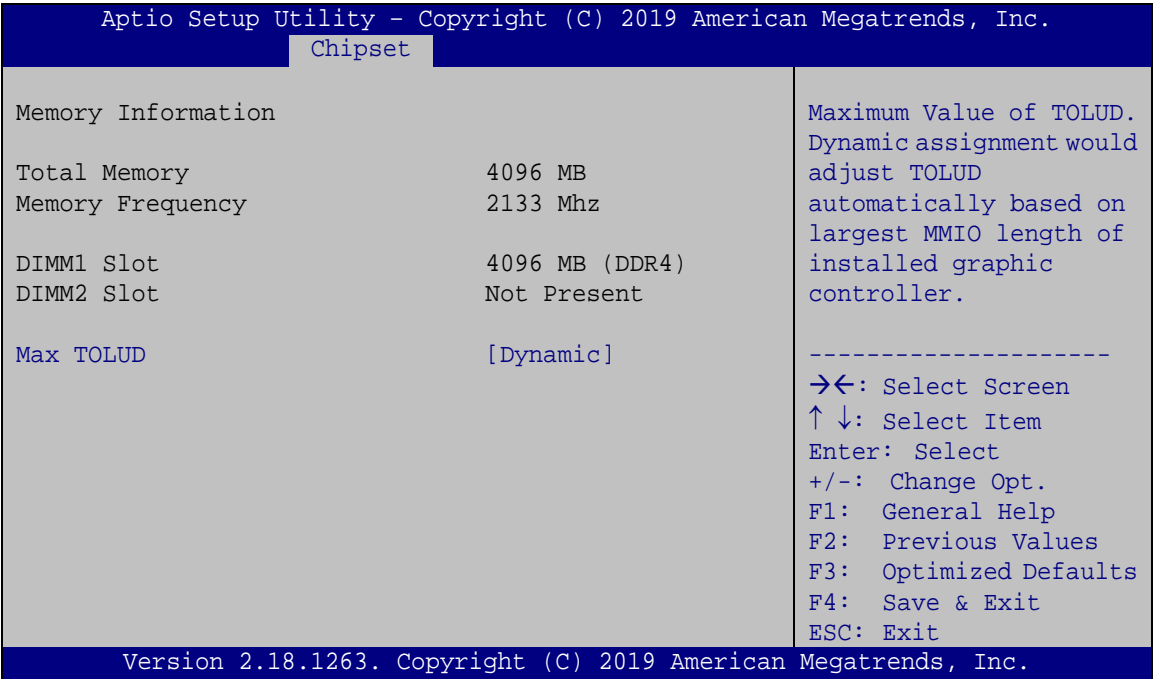

➔ VT-d [Disabled]

Use the **VT-d** option to enable or disable VT-d support.

- ➔ **Disabled**    **DEFAULT**    Disable VT-d support.
- ➔ **Enabled**                    Enable VT-d support.

5.4.1.1 Memory Configuration

Use the **Memory Configuration** submenu (**BIOS Menu 22**) to view memory information.

BIOS Menu 22: Memory Configuration

➔ Max TOLUD [Dynamic]

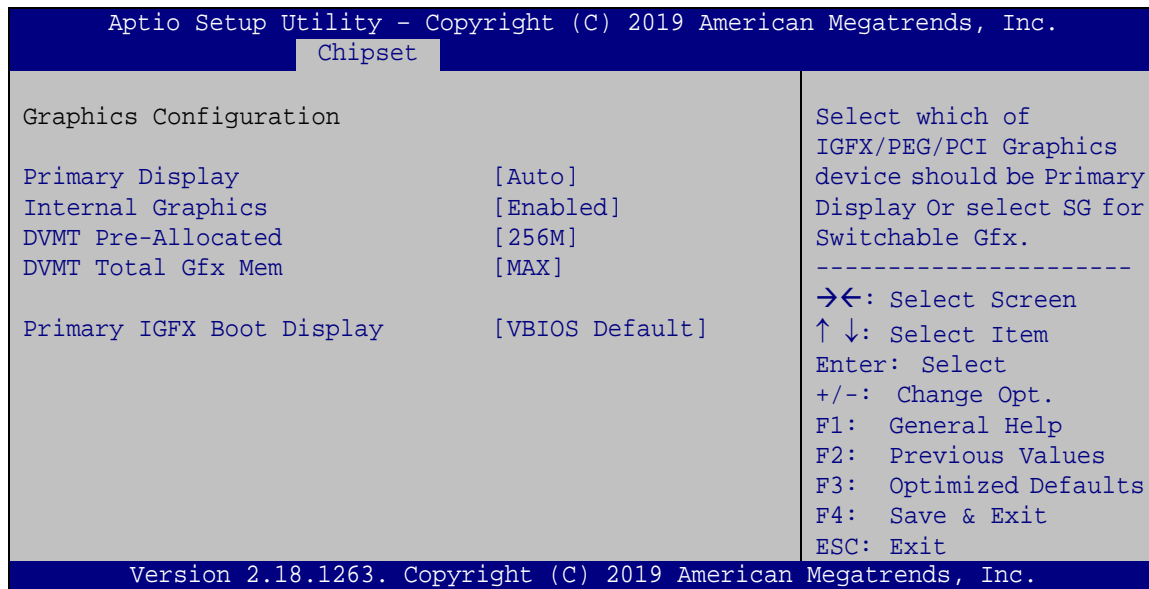

Use the **Max TOLUD** option to select the Maximum Value of TOLUD. Dynamic assignment would adjust TOLUD automatically based on largest MMIO length of installed graphic controller.

## TANK-870-Q170 Embedded System

### 5.4.1.2 Graphics Configuration

Use the **Graphics Configuration (BIOS Menu 23)** menu to configure the video device connected to the system.

#### BIOS Menu 23: Graphics Configuration

##### → Primary Display [Auto]

Use the **Primary Display** option to select the primary graphics controller the system uses.

The following options are available:

- Auto **Default**
- IGFX
- PEG
- PCI
- SG

##### → Internal Graphics [Enabled]

Use the **Internal Graphics** option to enable or disable IGFX. Keep IGFX enabled based on the setup options

- Auto
- Disabled

- Enabled                      **Default**

➔ **DVMT Pre-Allocated [256M]**

Use the **DVMT Pre-Allocated** option to set the amount of system memory allocated to the integrated graphics processor when the system boots. The system memory allocated can then only be used as graphics memory, and is no longer available to applications or the operating system. Configuration options are listed below:

- 32M
- 64M
- 128M
- 256M                      **Default**
- 512M

➔ **DVMT Total Gfx Mem [MAX]**

Use the **DVMT Total Gfx Mem** option to select DVMT5.0 total graphic memory size used by the internal graphic device. The following options are available:

- 256M
- 128M
- MAX                      **Default**

➔ **Primary IGFX Boot Display [VBIOS Default]**

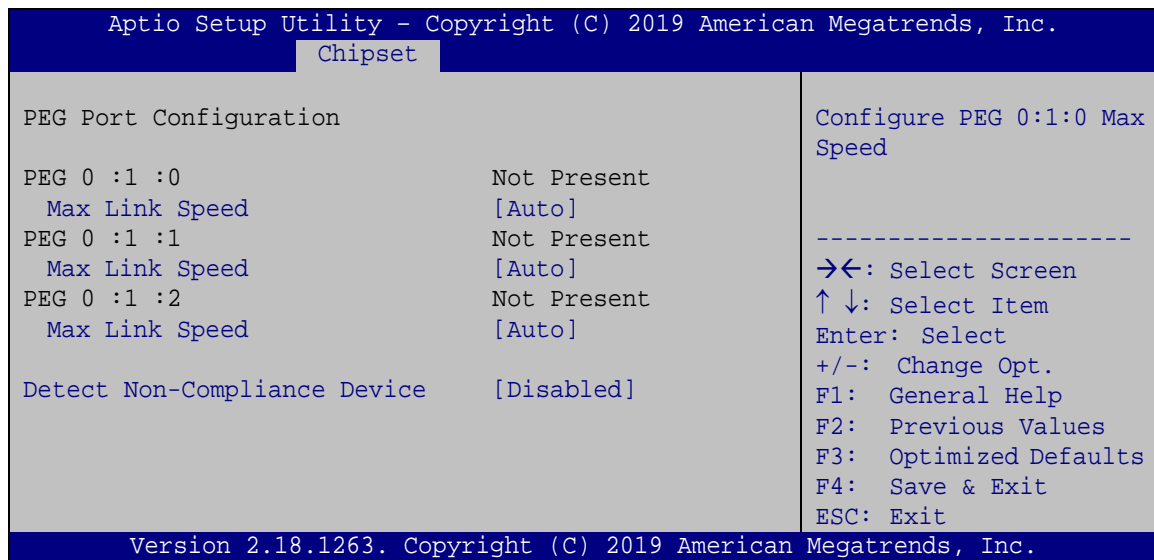

Use the **Primary IGFX Boot Display** option to select the display device used by the system when it boots. Configuration options are listed below.

- VBIOS Default              **DEFAULT**
- VGA
- DP\_HDMI1
- DP (Pin Header)

## TANK-870-Q170 Embedded System

## 5.4.1.3 PEG Port Configuration

## BIOS Menu 24: NB PCIe Configuration

## → Max Link Speed [Auto]

Use the **Max Link Speed** option to configure the PEG port max speed. The following options are available:

- Auto                      **Default**
- Gen1
- Gen2
- Gen3

## → Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to enable or disable detecting a non-compliance PCI Express device in the PEG. The following options are available:

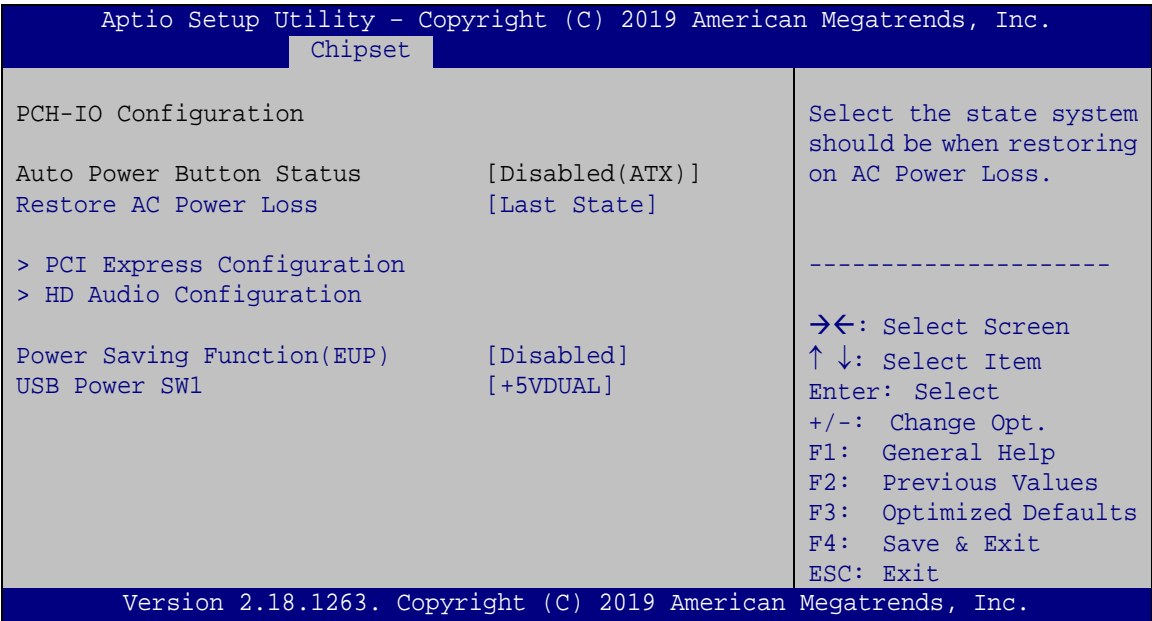

- Disabled                  **Default**
- Enabled

5.4.2 PCH-IO Configuration

Use the **PCH-IO Configuration** menu (**BIOS Menu 25**) to configure the PCH parameters.

BIOS Menu 25: PCH-IO Configuration

➔ **Restore AC Power Loss [Last State]**

Use the **Restore on AC Power Loss** option to specify what state the system returns to if there is a sudden loss of power to the system.

- ➔ **Power Off**                      The system remains turned off
- ➔ **Power On**                      The system turns on
- ➔ **Last State    DEFAULT**      The system returns to its previous state. If it was on, it turns itself on. If it was off, it remains off.

➔ **Power Saving Function (ERP) [Disabled]**

Use the **Power Saving Function (ERP)** BIOS option to enable or disable the power saving function.

- ➔ **Disabled      DEFAULT**      Power saving function is disabled.

## TANK-870-Q170 Embedded System

- ➔ **Enabled** Power saving function is enabled. It will reduce power consumption when the system is off.

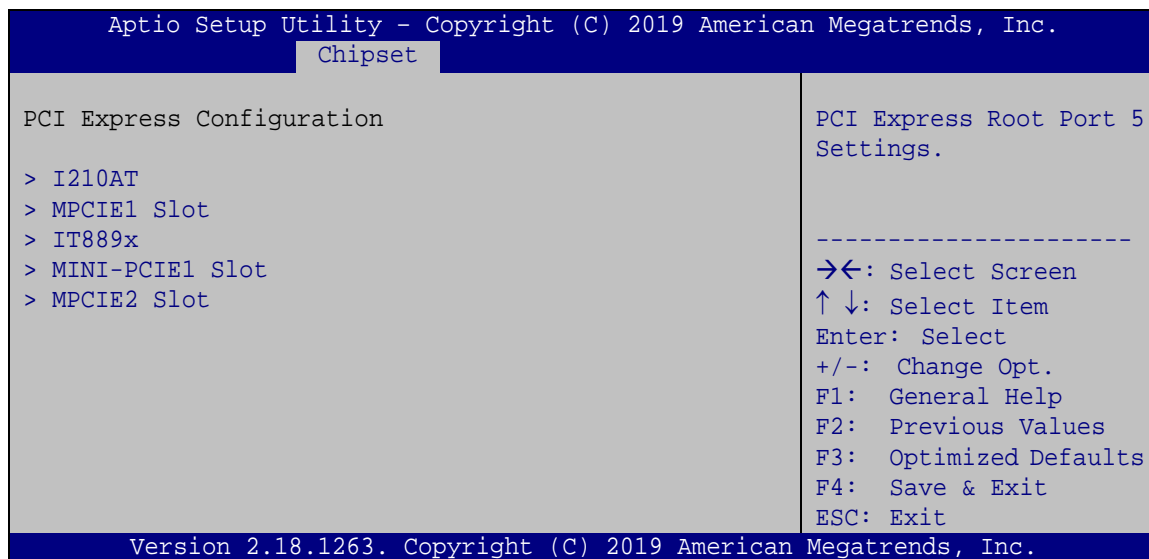

### ➔ **USB Power SW1 [+5V DUAL]**

Use the **USB Power SW1** BIOS option to configure the USB power source for the corresponding USB connectors.

- ➔ **+5V** Sets the USB power source to +5V
- ➔ **+5VDUAL** **DEFAULT** Sets the USB power source to +5V dual

### 5.4.2.1 PCI Express Configuration

Use the **PCI Express Configuration** menu (**BIOS Menu 26**) to select the support type of the PCIe Mini slot.

#### **BIOS Menu 26: PCI Express Configuration**

The **I210AT**, **MPCIE1 Slot**, **IT889x**, **MINI-PCIE1 Slot** and **MPCIE2 Slot** submenus all contain the following options:

→ **PCI Express Root [Enabled]**

Use the **PCI Express Root** option to enable or disable the PCI Express (PEG) controller.

The following options are available:

- Disabled
- Enabled **Default**

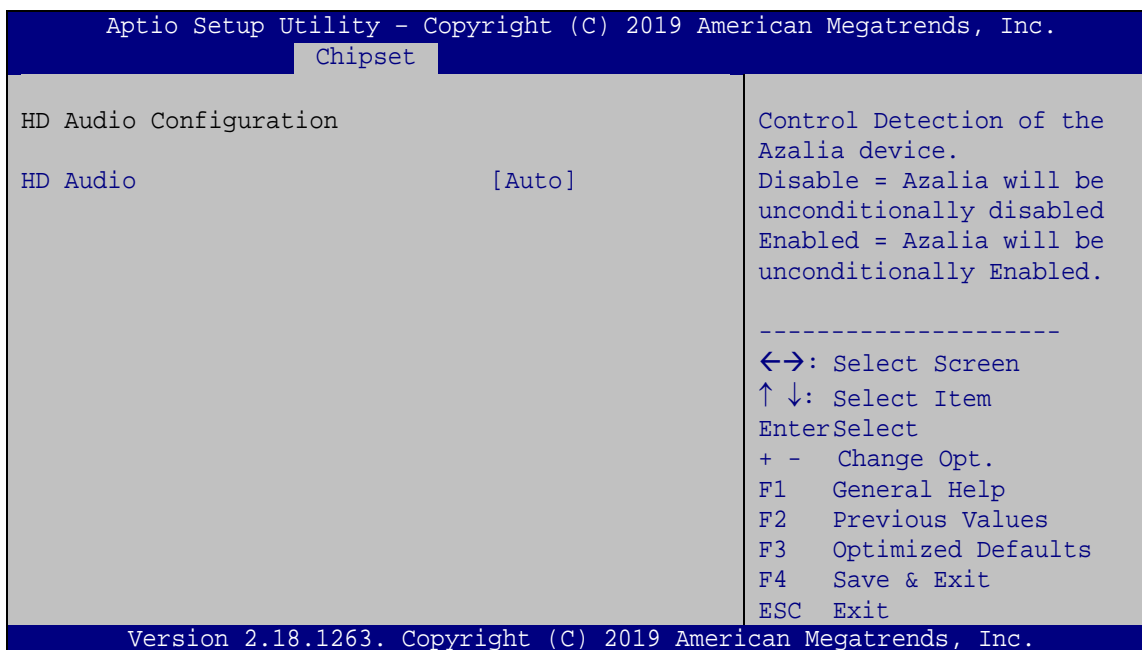

→ **PCIe Speed**

Use PCIe Speed option to select the speed type of the PCIe Mini slot. The following options are available:

- Auto **Default**
- Gen1
- Gen2
- Gen3

**5.4.2.2 HD Audio Configuration**

Use the **HD Audio Configuration** submenu (**BIOS Menu 27**) to configure the High Definition Audio codec.

**BIOS Menu 27: HD Audio Configuration**

## TANK-870-Q170 Embedded System

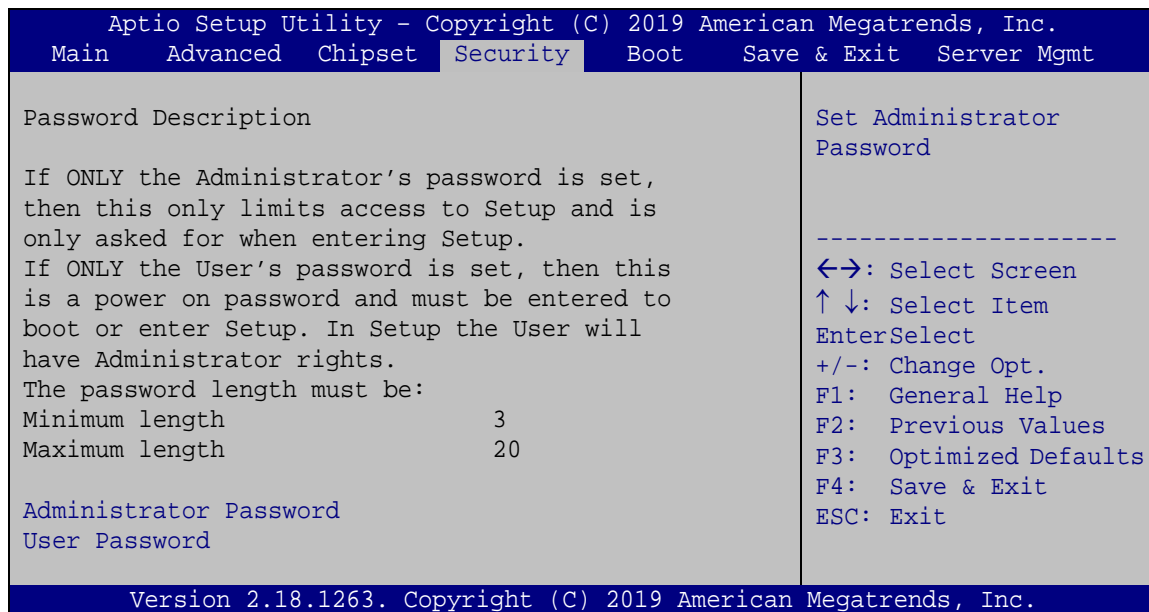

### → HD Audio [Auto]

Use the **HD Audio** BIOS option to enable or disable the High Definition Audio controller.

- **Disabled**                      The High Definition Audio controller is disabled.
- **Enabled**                      The High Definition Audio controller is enabled.
- **Auto**                      **DEFAULT**      The onboard High Definition Audio controller automatically detected and enabled.

## 5.5 Security

Use the **Security** menu (**BIOS Menu 28**) to set system and user passwords.

### BIOS Menu 28: Security

#### → Administrator Password

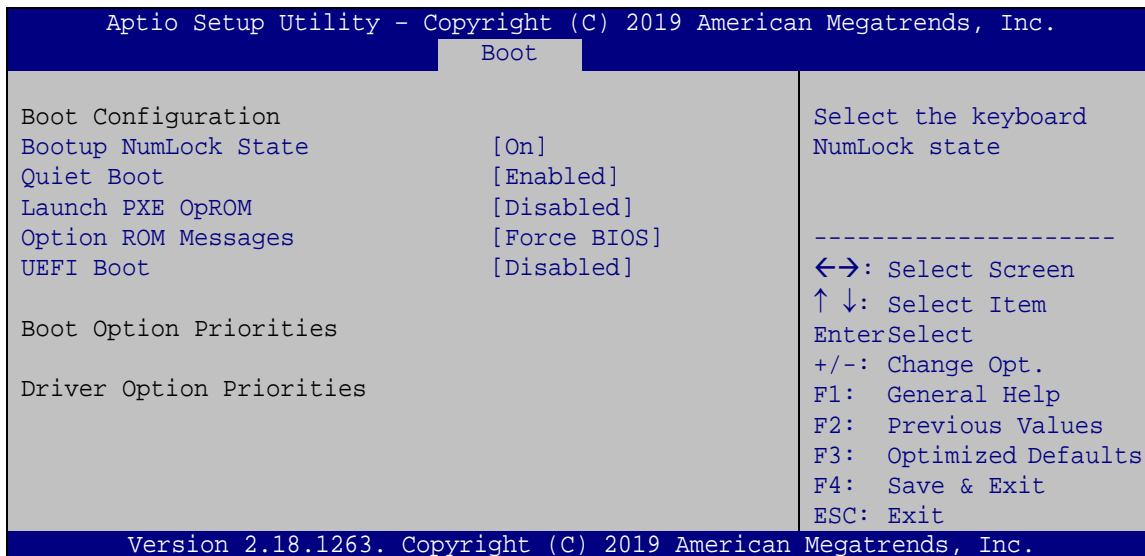

Use the **Administrator Password** to set or change an administrator password.

#### → User Password

Use the **User Password** to set or change a user password.

## 5.6 Boot

Use the **Boot** menu (**BIOS Menu 29**) to configure system boot options.

### BIOS Menu 29: Boot

#### ➔ Bootup NumLock State [On]

Use the **Bootup NumLock State** BIOS option to specify if the number lock setting must be modified during boot up.

- |   |            |                |  |
|---|------------|----------------|--|
| ➔ | <b>On</b>  | <b>DEFAULT</b> | Allows the Number Lock on the keyboard to be enabled automatically when the computer system boots up. This allows the immediate use of the 10-key numeric keypad located on the right side of the keyboard. To confirm this, the Number Lock LED light on the keyboard is lit. |
| ➔ | <b>Off</b> |                | Does not enable the keyboard Number Lock automatically. To use the 10-keys on the keyboard, press the Number Lock key located on the upper left-hand corner of the 10-key pad. The Number Lock LED on the keyboard lights up when the Number Lock is engaged.                  |

## TANK-870-Q170 Embedded System

### → Quiet Boot [Enabled]

Use the **Quiet Boot** BIOS option to select the screen display when the system boots.

- |   |                 |                |   |
|---|-----------------|----------------|---|
| → | <b>Disabled</b> |                | Normal POST messages displayed              |
| → | <b>Enabled</b>  | <b>DEFAULT</b> | OEM Logo displayed instead of POST messages |

### → Launch PXE OpROM [Disabled]

Use the **Launch PXE OpROM** option to enable or disable boot option for legacy network devices.

- |   |                 |                |                            |
|---|-----------------|----------------|----------------------------|
| → | <b>Disabled</b> | <b>DEFAULT</b> | Ignore all PXE Option ROMs |
| → | <b>Enabled</b>  |                | Load PXE Option ROMs.      |

### → Option ROM Messages [Force BIOS]

Use the **Option ROM Messages** option to set the Option ROM display mode.

- |   |                     |                |                                  |
|---|---------------------|----------------|----------------------------------|
| → | <b>Force BIOS</b>   | <b>DEFAULT</b> | Sets display mode to force BIOS. |
| → | <b>Keep Current</b> |                | Sets display mode to current.    |

### → UEFI Boot [Disabled]

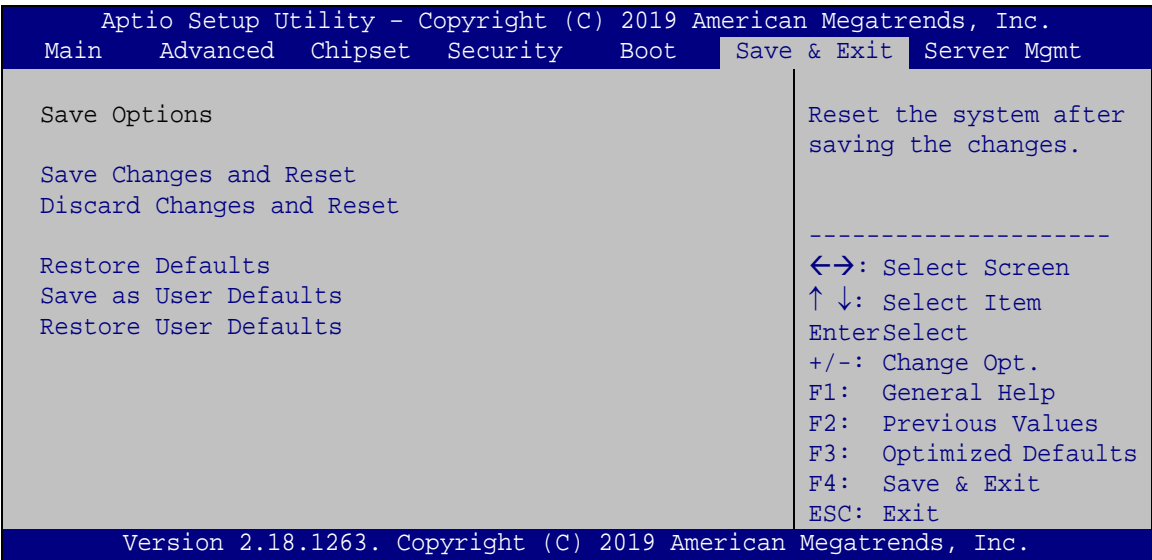

Use the **UEFI Boot** option to enable or disable to boot from the UEFI devices.

- |   |                 |                |                                     |
|---|-----------------|----------------|-------------------------------------|
| → | <b>Disabled</b> | <b>DEFAULT</b> | Boot from UEFI devices is disabled. |
| → | <b>Enabled</b>  |                | Boot from UEFI devices is enabled.  |

## 5.7 Save & Exit

Use the **Save & Exit** menu (**BIOS Menu 30**) to load default BIOS values, optimal failsafe values and to save configuration changes.

### BIOS Menu 30:Exit

➔ **Save Changes and Reset**

Use the **Save Changes and Reset** option to save the changes made to the BIOS options and reset the system.

➔ **Discard Changes and Reset**

Use the **Discard Changes and Reset** option to exit the system without saving the changes made to the BIOS configuration setup program.

➔ **Restore Defaults**

Use the **Restore Defaults** option to load the optimal default values for each of the parameters on the Setup menus. **F3 key can be used for this operation.**

➔ **Save as User Defaults**

Use the **Save as User Defaults** option to save the changes done so far as user defaults.

## TANK-870-Q170 Embedded System

### → Restore User Defaults

Use the **Restore User Defaults** option to restore the user defaults to all the setup options.

## 5.8 Server Mgmt

Use the **Server Mgmt** menu (**BIOS Menu 31**) to access the server management menus.

```
Aptio Setup Utility - Copyright (C) 2019 American Megatrends, Inc.
Server Mgmt
BMC Self Test Status          FAILED
BMC Firmware Revision         Unknown
> System Event Log
> BMC network configuration

Press <Enter> to change
the SEL event log
configuration.

```

### BIOS Menu 31: Server Mgmt

5.8.1 System Event Log

Use the **System Event Log** menu (**BIOS Menu 32**) to configure the event log.

BIOS Menu 32: System Event Log

➔ **SEL Components [Enabled]**

Use the **SEL Components** option to enable or disable all features of system event logging during boot.

- ➔ **Disabled** Disables all features of system event logging during boot.
- ➔ **Enabled** **DEFAULT** Enables all features of system event logging during boot.

➔ **Erase SEL [No]**

Use **Erase SEL** option to select options for erasing SEL. The following options are available:

- **No** **Default**
- Yes, On next reset
- Yes, On every reset

## TANK-870-Q170 Embedded System

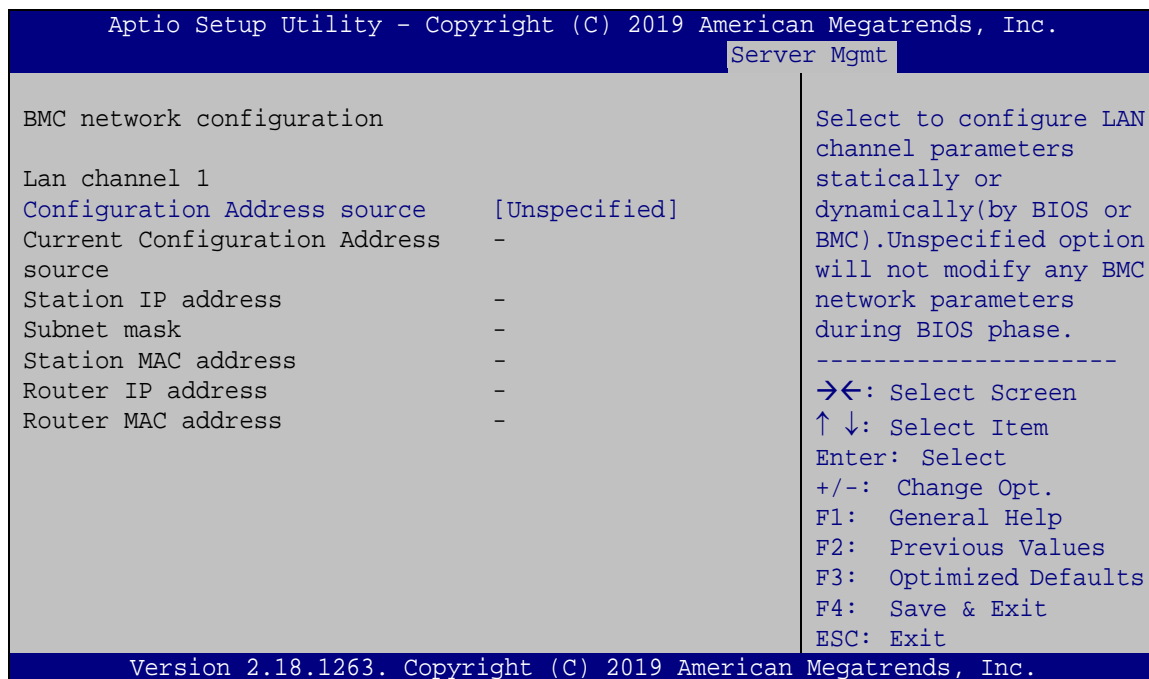

### → When SEL is Full [Do Nothing]

Use **When SEL is FULL** option to select options for reactions to a full SEL. The following options are available:

- Do Nothing **Default**
- Erase Immediately

## 5.8.2 BMC network configuration

Use the **BMC network configuration** menu (**BIOS Menu 33**) to configure BMC network parameters.

### BIOS Menu 33: BMC Network Configuration

### → Configuration Address source [Unspecified]

Use **Configuration Address source** option to configure LAN channel parameters. The following options are available:

- Unspecified **Default**
- Static
- DynamicBmcDhcp
- DynamicBmcNonDhcp

# **Regulatory Compliance**

---

**DECLARATION OF CONFORMITY**

This equipment is in conformity with the following EU directives:

- EMC Directive (2014/30/EU)
- Low-Voltage Directive (2014/35/EU)
- RoHS II Directive (2011/65/EU, 2015/863/EU)

If the user modifies and/or install other devices in the equipment, the CE conformity declaration may no longer apply.

If this equipment has telecommunications functionality, it also complies with the requirements of the Radio Equipment Directive 2014/53/EU.

---

**English**

IEI Integration Corp declares that this equipment is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

---

**Български [Bulgarian]**

IEI Integration Corp. декларира, че този оборудване е в съответствие със съществените изисквания и другите приложими правила на Директива 2014/53/EU.

---

**Česky [Czech]**

IEI Integration Corp tímto prohlašuje, že tento zařízení je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 2014/53/EU.

---

**Dansk [Danish]**

IEI Integration Corp erklærer herved, at følgende udstyr overholder de væsentlige krav og øvrige relevante krav i direktiv 2014/53/EU.

---

### Magyar [Hungarian]

IEI Integration Corp nyilatkozom, hogy a berendezés megfelel a vonatkozó alapvető követelményeknek és az 2014/53/EU irányelv egyéb előírásainak.

---

### Polski [Polish]

IEI Integration Corp oświadcza, że wyrobu jest zgodny z zasadniczymi wymogami oraz pozostałymi stosownymi postanowieniami Dyrektywy 2014/53/EU.

---

### Português [Portuguese]

IEI Integration Corp declara que este equipamento está conforme com os requisitos essenciais e outras disposições da Directiva 2014/53/EU.

---

### Româna [Romanian]

IEI Integration Corp declară că acest echipament este în conformitate cu cerințele esențiale și cu celelalte prevederi relevante ale Directivei 2014/53/EU.

---

### Slovensko [Slovenian]

IEI Integration Corp izjavlja, da je ta opreme v skladu z bistvenimi zahtevami in ostalimi relevantnimi določili direktive 2014/53/EU.

---

### Slovensky [Slovak]

IEI Integration Corp týmto vyhlasuje, že zariadenia spĺňa základné požiadavky a všetky príslušné ustanovenia Smernice 2014/53/EU.

---

### Suomi [Finnish]

IEI Integration Corp vakuuttaa täten että laitteet on direktiivin 2014/53/EU oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen.

---

### Svenska [Swedish]

IEI Integration Corp förklarar att denna utrustningstyp står i överensstämmelse med de väsentliga egenskapskrav och övriga relevanta bestämmelser som framgår av direktiv 2014/53/EU.

---

**FCC WARNING**

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**Federal Communication Commission Interference Statement**

This equipment has been assembled with components that comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**C**

# **Terminology**

---

<b>AC '97</b>	Audio Codec 97 (AC'97) refers to a codec standard developed by Intel® in 1997.
<b>ACPI</b>	Advanced Configuration and Power Interface (ACPI) is an OS-directed configuration, power management, and thermal management interface.
<b>AHCI</b>	Advanced Host Controller Interface (AHCI) is a SATA Host controller register-level interface.
<b>ATA</b>	The Advanced Technology Attachment (ATA) interface connects storage devices including hard disks and CD-ROM drives to a computer.
<b>ARMD</b>	An ATAPI Removable Media Device (ARMD) is any ATAPI device that supports removable media, besides CD and DVD drives.
<b>ASKIR</b>	Amplitude Shift Keyed Infrared (ASKIR) is a form of modulation that represents a digital signal by varying the amplitude ("volume") of the signal. A low amplitude signal represents a binary 0, while a high amplitude signal represents a binary 1.
<b>BIOS</b>	The Basic Input/Output System (BIOS) is firmware that is first run when the computer is turned on and can be configured by the end user
<b>CODEC</b>	The Compressor-Decompressor (CODEC) encodes and decodes digital audio data on the system.
<b>CompactFlash®</b>	CompactFlash® is a solid-state storage device. CompactFlash® devices use flash memory in a standard size enclosure. Type II is thicker than Type I, but a Type II slot can support both types.
<b>CMOS</b>	Complimentary metal-oxide-conductor is an integrated circuit used in chips like static RAM and microprocessors.
<b>COM</b>	COM refers to serial ports. Serial ports offer serial communication to expansion devices. The serial port on a personal computer is usually a male D-sub 9 connector.
<b>DAC</b>	The Digital-to-Analog Converter (DAC) converts digital signals to analog signals.
<b>DDR</b>	Double Data Rate refers to a data bus transferring data on both the rising and falling edges of the clock signal.

**TANK-870-Q170 Embedded System**

<b>DMA</b>	Direct Memory Access (DMA) enables some peripheral devices to bypass the system processor and communicate directly with the system memory.
<b>DIMM</b>	Dual Inline Memory Modules are a type of RAM that offer a 64-bit data bus and have separate electrical contacts on each side of the module.
<b>DIO</b>	The digital inputs and digital outputs are general control signals that control the on/off circuit of external devices or TTL devices. Data can be read or written to the selected address to enable the DIO functions.
<b>EHCI</b>	The Enhanced Host Controller Interface (EHCI) specification is a register-level interface description for USB 2.0 Host Controllers.
<b>EIDE</b>	Enhanced IDE (EIDE) is a newer IDE interface standard that has data transfer rates between 4.0 MBps and 16.6 MBps.
<b>EIST</b>	Enhanced Intel® SpeedStep Technology (EIST) allows users to modify the power consumption levels and processor performance through application software. The application software changes the bus-to-core frequency ratio and the processor core voltage.
<b>FSB</b>	The Front Side Bus (FSB) is the bi-directional communication channel between the processor and the Northbridge chipset.
<b>GbE</b>	Gigabit Ethernet (GbE) is an Ethernet version that transfers data at 1.0 Gbps and complies with the IEEE 802.3-2005 standard.
<b>GPIO</b>	General purpose input
<b>HDD</b>	Hard disk drive (HDD) is a type of magnetic, non-volatile computer storage device that stores digitally encoded data.
<b>ICH</b>	The Input/Output Control Hub (ICH) is an Intel® Southbridge chipset.
<b>IrDA</b>	Infrared Data Association (IrDA) specify infrared data transmission protocols used to enable electronic devices to wirelessly communicate with each other.
<b>L1 Cache</b>	The Level 1 Cache (L1 Cache) is a small memory cache built into the system processor.
<b>L2 Cache</b>	The Level 2 Cache (L2 Cache) is an external processor memory cache.

<b>LCD</b>	Liquid crystal display (LCD) is a flat, low-power display device that consists of two polarizing plates with a liquid crystal panel in between.
<b>LVDS</b>	Low-voltage differential signaling (LVDS) is a dual-wire, high-speed differential electrical signaling system commonly used to connect LCD displays to a computer.
<b>POST</b>	The Power-on Self Test (POST) is the pre-boot actions the system performs when the system is turned-on.
<b>RAM</b>	Random Access Memory (RAM) is volatile memory that loses data when power is lost. RAM has very fast data transfer rates compared to other storage like hard drives.
<b>SATA</b>	Serial ATA (SATA) is a serial communications bus designed for data transfers between storage devices and the computer chipsets. The SATA bus has transfer speeds up to 1.5 Gbps and the SATA II bus has data transfer speeds of up to 3.0 Gbps.
<b>S.M.A.R.T</b>	Self Monitoring Analysis and Reporting Technology (S.M.A.R.T) refers to automatic status checking technology implemented on hard disk drives.
<b>UART</b>	Universal Asynchronous Receiver-transmitter (UART) is responsible for asynchronous communications on the system and manages the system's serial communication (COM) ports.
<b>UHCI</b>	The Universal Host Controller Interface (UHCI) specification is a register-level interface description for USB 1.1 Host Controllers.
<b>USB</b>	The Universal Serial Bus (USB) is an external bus standard for interfacing devices. USB 1.1 supports 12Mbps data transfer rates and USB 2.0 supports 480Mbps data transfer rates.
<b>VGA</b>	The Video Graphics Array (VGA) is a graphics display system developed by IBM.

**D**

# **Safety Precautions**

---

## D.1 Safety Precautions

---

### WARNING:

The precautions outlined in this appendix should be strictly followed. Failure to follow these precautions may result in permanent damage to the TANK-870-Q170 Series.

---

Please follow the safety precautions outlined in the sections that follow:

### D.1.1 General Safety Precautions

Please ensure the following safety precautions are adhered to at all times.

- ***Make sure the power is turned off and the power cord is disconnected*** when moving, installing or modifying the system.
- ***Do not apply voltage levels that exceed the specified voltage range.***  
Doing so may cause fire and/or an electrical shock.
- ***Electric shocks can occur*** if opened while still powered on.
- ***Do not drop or insert any objects*** into the ventilation openings.
- ***If considerable amounts of dust, water, or fluids enter the system***, turn off the power supply immediately, unplug the power cord, and contact the system vendor.
- **DO NOT:**
  - Drop the system against a hard surface.
  - In a site where the ambient temperature exceeds the rated temperature

## TANK-870-Q170 Embedded System

### D.1.2 Anti-static Precautions

#### WARNING:

Failure to take ESD precautions during the installation of the TANK-870-Q170 Series may result in permanent damage to the TANK-870-Q170 Series and severe injury to the user.

---

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the TANK-870-Q170 Series. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the TANK-870-Q170 Series is opened and any of the electrical components are handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging any electrical component.
- ***Self-grounding:*** Before handling any electrical component, touch any grounded conducting material. During the time the electrical component is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring or working with an electrical component, place it on an anti-static pad. This reduces the possibility of ESD damage.
- ***Only handle the edges of the electrical component:*** When handling the electrical component, hold the electrical component by its edges.

### D.1.3 Product Disposal

**CAUTION:**

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union—If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union—The device that produces less waste and is easier to recycle is classified as electronic device in terms of the European Directive 2012/19/EU (WEEE), and must not be disposed of as domestic garbage.

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords.

When you need to dispose of your display products, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

### D.2 Maintenance and Cleaning Precautions

When maintaining or cleaning the TANK-870-Q170 Series, please follow the guidelines below.

## TANK-870-Q170 Embedded System

### D.2.1 Maintenance and Cleaning

Prior to cleaning any part or component of the TANK-870-Q170 Series, please read the details below.

- The interior of the TANK-870-Q170 Series does not require cleaning. Keep fluids away from the TANK-870-Q170 Series interior.
- Be cautious of all small removable components when vacuuming the TANK-870-Q170 Series.
- Turn the TANK-870-Q170 Series off before cleaning the TANK-870-Q170 Series.
- Never drop any objects or liquids through the openings of the TANK-870-Q170 Series.
- Be cautious of any possible allergic reactions to solvents or chemicals used when cleaning the TANK-870-Q170 Series.
- Avoid eating, drinking and smoking within vicinity of the TANK-870-Q170 Series.

### D.2.2 Cleaning Tools

Some components in the TANK-870-Q170 Series may only be cleaned using a product specifically designed for the purpose. In such case, the product will be explicitly mentioned in the cleaning tips. Below is a list of items to use when cleaning the TANK-870-Q170 Series.

- ☐ **Cloth** – Although paper towels or tissues can be used, a soft, clean piece of cloth is recommended when cleaning the TANK-870-Q170 Series.
- **Water or rubbing alcohol** – A cloth moistened with water or rubbing alcohol can be used to clean the TANK-870-Q170 Series.
- **Using solvents** – The use of solvents is not recommended when cleaning the TANK-870-Q170 Series as they may damage the plastic parts.
- **Vacuum cleaner** – Using a vacuum specifically designed for computers is one of the best methods of cleaning the TANK-870-Q170 Series. Dust and dirt can restrict the airflow in the TANK-870-Q170 Series and cause its circuitry to corrode.

## TANK-870-Q170 Embedded System

- **Cotton swabs** - Cotton swabs moistened with rubbing alcohol or water are excellent tools for wiping hard to reach areas.
- **Foam swabs** - Whenever possible, it is best to use lint free swabs such as foam swabs for cleaning.

**Appendix**

**E**

# **Digital I/O Interface**

---

E.1 Introduction

The DIO connector on the TANK-870-Q170 Series is interfaced to GPIO ports on the Super I/O chipset. The DIO has both 4-bit digital inputs and 4-bit digital outputs. The digital inputs and digital outputs are generally control signals that control the on/off circuit of external devices or TTL devices. Data can be read or written to the selected address to enable the DIO functions.

NOTE:

For further information, please refer to the datasheet for the Super I/O chipset.

The BIOS interrupt call **INT 15H** controls the digital I/O.

**INT 15H:**

AH – 6FH
<u>Sub-function:</u>
AL – 8 : Set the digital port as INPUT
AL : Digital I/O input value

## TANK-870-Q170 Embedded System

## E.2 Assembly Language Sample 1

```

MOV     AX, 6F08H      ;setting the digital port as input
INT     15H            ;

```

AL low byte = value

AH – 6FH
<u>Sub-function:</u> AL – 9 : Set the digital port as OUTPUT BL : Digital I/O input value

## E.3 Assembly Language Sample 2

```

MOV     AX, 6F09H      ;setting the digital port as output
MOV     BL, 09H        ;digital value is 09H
INT     15H            ;

```

Digital Output is 1001b

## TANK-870-Q170 Embedded System

### G.1 RoHS II Directive (2015/863/EU)

The details provided in this appendix are to ensure that the product is compliant with the RoHS II Directive (2015/863/EU). The table below acknowledges the presences of small quantities of certain substances in the product, and is applicable to RoHS II Directive (2015/863/EU).

Please refer to the following table.

Part Name	Toxic or Hazardous Substances and Elements									
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)	Bis(2-ethylhexyl) phthalate (DEHP)	Butyl benzyl phthalate (BBP)	Dibutyl phthalate (DBP)	Diisobutyl phthalate (DIBP)
Housing	O	O	O	O	O	O	O	O	O	O
Printed Circuit Board	O	O	O	O	O	O	O	O	O	O
Metal Fasteners	O	O	O	O	O	O	O	O	O	O
Cable Assembly	O	O	O	O	O	O	O	O	O	O
Fan Assembly	O	O	O	O	O	O	O	O	O	O
Power Supply Assemblies	O	O	O	O	O	O	O	O	O	O
Battery	O	O	O	O	O	O	O	O	O	O
<p>O: This toxic or hazardous substance is contained in all of the homogeneous materials for the part is below the limit requirement in Directive (EU) 2015/863.</p> <p>X: This toxic or hazardous substance is contained in at least one of the homogeneous materials for this part is above the limit requirement in Directive (EU) 2015/863.</p>										

G.2 China RoHS

此附件旨在确保本产品符合中国 RoHS 标准。以下表格标示此产品中某有毒物质的含量符合中国 RoHS 标准规定的限量要求。

本产品上会附有“环境友好使用期限”的标签，此期限是估算这些物质“不会有泄漏或突变”的年限。本产品可能包含有较短的环境友好使用期限的可替换元件，像是电池或灯管，这些元件将会单独标示出来。

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (CR(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
壳体	O	O	O	O	O	O
印刷电路板	O	O	O	O	O	O
金属螺帽	O	O	O	O	O	O
电缆组装	O	O	O	O	O	O
风扇组装	O	O	O	O	O	O
电力供应组装	O	O	O	O	O	O
电池	O	O	O	O	O	O
O: 表示该有毒有害物质在该部件所有物质材料中的含量均在 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求以下。 X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求。
